MEMORANDUM.

The Gross Estimated Rentals comprised in the Columns of this Return have been computed in the following manner:—

1. In the several Columns, 1, 2, 3, 4, 5, and 6, the total number of Male Occupations, as shown at similar amounts in the Return E (Electoral Returns) have been taken, and each Occupation calculated as representing the medium sum; thus in Col. 1 (4 *l.* and under 5 *l.*) the Amount of each Occupation has been assumed to be 4 *l.* 10 *s.*, and so on with respect to all the other Columns under 10 *l.*

2. In estimating the Gross Estimated Rentals at 10 *l.* and upwards (Col. 7), the Total of the Gross Estimated Rental of the whole of the Lands and Hereditaments within each Borough has been taken as the basis of the calculation. From this a deduction of 20 per cent. has been made for Female Occupiers and empty Houses. From the Balance so ascertained, the Amounts of the several Columns from 1 to 6 have been subtracted, and also an Estimated Amount for the Male Occupations under 4 *l.*, each Occupation being taken at the medium Sum of 2 *l.*

Note (a).—The variation between the total male occupiers at 50 *l.* and upwards, according to Return I., and that in the "Electoral Returns" should be attributed to the circumstance that the returns from some of the unions have not been received; and also that Return I. has been made from valuation lists of a later date than those from which the "Electoral Returns" were compiled.

Note (b).—The union which has failed to make return (sections I., II., IV.,) is Swansea (population of the part not in borough 12,993 in Glamorgan).

RETURN to an Address of the Honourable The House of Commons, dated 20 March 1866;—*for*,

" RETURN of the ELECTORAL STATISTICS of each Contributory BOROUGH in *Wales*, in the same Form as that presented to the House in the General Electoral Returns."

Poor Law Board,

JOHN LAMBERT,

Appointed to superintend the Collection and Arrangement of the Electoral Returns.

(*Mr. Hanbury Tracy.*)

Ordered, by The House of Commons, *to be Printed*,

MEMORANDUM.

THE following Returns have been prepared chiefly from the particulars obtained for the Electoral Statistics presented on the 9th March last.

In some instances the number of double entries on the Register of Voters, and the number of persons who voted at the last election, were not furnished for each Borough, and consequently this information is only given for the whole of each group of Boroughs. For a like reason, the statement of the Gross Estimated Rental, according to the Income Tax Assessment, Schedule A., is entered in one gross sum for each district.

From some Unions later information than that contained in the former Returns has been obtained with reference to the Gross Estimated Rental and Rateable Value, and also as to the number of Male Occupations; and this has been embodied in the present Return.

Whenever the Return states that a Borough is not a Municipal Borough, it must be understood to mean that the Borough is not subject to the Municipal Corporation Act, 5 & 6 Will. 4, c. 96.

The Return relates to Contributory Boroughs only; the Parliamentary Boroughs of Brecknock and Merthyr Tydvil are therefore not included in it.

John Lambert.

* With reference to the small number of electors on the register, as compared with the occupiers at a gross estimated rental of 10 *l.* and upwards, it is stated that it is principally attributable to, 1st, the very fluctuating character of a great part of the population of the town, a very large portion of the houses in St. Mary being let to weekly tenants, who frequently change; and, 2ndly, the circumstance that at the time when the last register was made, a very large number of ratepayers were disqualified by nonpayment of rates. This was undoubtedly, to a great extent, the result of neglect on the part of the late assistant overseer, who has resigned.

* With reference to the number of Electors, as compared with the number of occupiers, at a Gross Estimated Rental of 10 *l.*, it is stated that many new houses have recently been built in the Borough, and the tenants have not been resident a sufficient time to enable them to be placed on the register.

† With regard to the Parishes in the Wrexham Union, it is stated that as the Gross Estimated Rental is not ascertained from a return of the actual rent by the tenant, but is assumed or fixed by a valuer or the overseers, the Income Tax assessment affords more reliable information as to the gross value of the property.

Aggregate Summary for Counties - - 83
Corrections in Electoral Returns, Boroughs and Counties, 1865–66 - - - 84
A List of the principal Parliamentary Returns and Papers relating to the Electoral Franchise issued during the Session 1866 - 85

MEMORANDUM.

The object of the accompanying Summary is to furnish, in respect of the several counties of England and Wales, information analogous to that contained in the Borough Summary of the Electoral Returns presented to both Houses of Parliament on the ninth day of March last.

The particulars supplied under the head of each County and Parliamentary Division of a County are the following:—

1. The number of Members returned;
2. The amount of Election Expenses at the last General Election;
3. The Population (exclusive of represented Boroughs) in 1831 and 1861;
4. The number of Inhabited Houses in 1861;
5. The number of Electors in 1835–6 and 1864–5, distinguished under their different qualifications;
6. The number of Electors whose qualifying Property is within a Parliamentary Borough;
7. The number of Male Occupiers, who are also Owners, at a Gross Estimated Rental and Rateable Value of certain stated amounts;
8. The aggregate Gross Estimated Rental and Rateable Value of the Property within each County or Division in the years 1856 and 1865;
9. The number of Male Occupiers, exclusive of those who are also Owners, at a Gross Estimated Rental and Rateable Value of certain stated amounts;
10. The number of Parliamentary Boroughs with the Population in 1861, the actual number of Electors on the Register for 1865–6, after deducting double entries, and the number of Members returned for each Borough;
11. The number of unrepresented Towns, and the Population of each;
12. And the names of the Polling Places in each County or Division.

It will thus be seen that the Summary contains information in addition to that comprised in the Electoral Returns already referred to:

The amount of Election Expenses is taken from the Abstract of the Returns No. 160 of the present session, moved for by Mr. Moffatt.

The number of Inhabited Houses is that stated in the Census of 1861.

The number of Electors for 1835–6, distributed under their several qualifications, has been extracted from the Return No. 329. (1838), being the first return after the passing of the Reform Act in which that particular information is given.

The corresponding particulars for 1864–5 are taken from the Return No. 448. (1865).

The Return No. 329. (1838) does not contain any columns for "Joint Qualifications" and "Other Qualifications," but it is obvious that although these distinctions are made in the Return No. 448. (1865), they do not furnish any information as to the nature of the various qualifications included under them.

In some instances the number of Electors qualified as Leaseholders for lives, Owners of Rentcharges and Redeemed Land Tax, and Annuitants, are separately entered in the Return No. 329. (1838), but in order to make the two Returns correspond as nearly as practicable all the Electors entered under these heads have been included as Freeholders.

The Return No. 448. (1865) has no column for Leaseholders, who, it would appear, have been returned under the heading of "Joint Qualifications" or that of "other Qualifications."

The number of Electors whose qualifying property is in a Parliamentary Borough is taken from the Return No. 335. of the present Session, but in a note to that Return it is stated that "several Boroughs comprise parts only
" of Parishes, and it is believed that no division is made in the Register (from
" which the numbers were extracted by the Sheriff) between that part of a
" Parish within the Borough and that beyond its limits."

The number of such Male Occupiers at Gross Estimated Rentals under £50, distinguishing those who are Owners from those who are not, has been extracted from the same Return in its corrected form.

The lists of Unrepresented Towns are taken from the Return No. 162. (1866), and they embrace those unrepresented Places with a population of 5,000 and upwards which are treated as towns by the Registrar General in the Census Report for 1861.

It should be observed that those Parliamentary Boroughs and Unrepresented Towns which are in more than one County are entered as within that County in which the greater part of the Borough or Town is situate.

The names of the polling places are those given in the Return No. 2. (1857), but the Gazette has been searched to ascertain whether any additional polling places have been appointed since the period at which that return was made, and the names of such additional polling places have been added.

At the end of the Summary will be found corrections of certain *errata* in the Electoral Returns presented on the 9th of March last. Also a List of the principal Parliamentary Returns and Papers relating to the Electoral Franchise issued during the Session 1866.

It remains to be stated, that the completion of the present Summary has been delayed for the purpose of including in it information which has only been recently obtained.

Poor Law Inspector.

ELECTORAL RETURNS.

MEMORANDUM.

The accompanying Returns have been obtained at the request of Her Majesty's Government, for the purpose of affording information with respect to the existing Borough and County Constituencies in England and Wales, and the probable addition which would be made to the present Number of Electors by an extension of the Franchise.

Boroughs.

With this view, instructions were given by the Poor Law Board (through which Department chiefly the Returns have been procured) that the following particulars should be ascertained and laid before the Government:

1. The Number of Borough Electors on the Parliamentary Register now in force, as compared with the Number in 1833, distinguishing such Electors according to their Qualifications, and deducting the double entries:
2. The Population of the several Parliamentary Boroughs at the same periods, or as near thereto as practicable:
3. The Number of Borough Electors who belong to the Working Classes:
4. The Number of Burgesses on the present Burgess Lists, showing how many of them are qualified in respect of premises for which the owner is rated, and how many of them are on the Parliamentary Register:
5. The Boroughs in which the Small Tenements Rating Acts, or any Local Acts authorizing the rating of Owners instead of Occupiers, are in force:
6. The Number of Male Occupiers in Boroughs at certain specified Rateable Values down to 4*l.*:
7. The total Gross Estimated Rental of each Borough, according to the Valuation Lists or last Poor Rate; the Gross Estimated Value according to the Income Tax Assessment; and the Gross Estimated Rental and Rateable Value, as shown in the Poor Rates prior to the passing of the Union Assessment Committee Act, 1862.

Counties.

8. And with respect to Counties, the Number of Male Occupiers at certain Rateable Values, ranging from 10*l.* to 50*l.*, and also at and above 50*l.* Gross Estimated Rental; the Number of Electors on the Register as Occupying Tenants; the total Number of Electors on the Parliamentary Register, as compared with the Number on the Register of 1833; and the Gross Estimated Rental and Rateable Value of the Property in each County or Electoral Division before and since the passing of the Union Assessment Committee Act, 1862.

The information, which has been obtained in relation to the foregoing subjects, is contained in the Returns A., B., C., D., F., and G., and the annexed Abstracts.

Return A.

Boroughs.

Population and Electors.

This Return shows, in respect of the several Boroughs, the increase or decrease between the Population in 1831 and the Estimated Population in 1866; the increase or decrease between the total Number of Electors on the Parliamentary Register for 1832-3, and the Register for 1865-6; the present actual Number of Electors, after deducting double entries, and the Number of Electors who voted at the last General Election.

The Estimate of the Population for 1866 has been made by the Registrar General, and the principle upon which his computation is based is the same as that adopted for the Parliamentary Return in 1859 (No. 121.), and will be found explained in a note at the foot of the present Return.

The Number of Electors on the Register for 1832-3 has been taken from the Return No. 189. (1833).

The descriptions of the qualifications which were reserved by the 2 W. 4. c. 45. (the Reform Act) have been corrected, where necessary, and in those few instances where the Number of Voters was not inserted in the Return for 1833, the defect has been supplied from the Return No. 329. (1838).

The Number of Electors on the present Register has been obtained through the Home Office from the Returning Officers, who have also supplied the information necessary for filling up the column which shows the Number of Electors who voted at the last General Election.

Return B.

Analysis of Registers.

This Return gives the Number of Borough Electors on the Register for 1865-6, distinguished according to their several qualifications, and the Number of Electors who belong to the Working Classes.

The Returning Officers have been enabled to state the Number of Electors whose names are entered more than once upon the Register in respect of double qualifications. In a few cases, where the Returning Officers have been unable to supply this information, the number of duplicate entries has been obtained either from the Registration Agents or the Union Clerks. In order to render the statistics relative to the Number and Qualifications of Electors as accurate as possible, the figures furnished by the Returning Officers have been compared in most instances with the Registers themselves.

Number of Working Classes in possession of the Franchise.

With regard to that portion of Return B. which shows the Number of the Working Classes, the particulars have been obtained, through the agency of the various Union Clerks, from those Union and Parochial Officers whose duties necessarily bring them into frequent communication with the ratepayers of each locality.

The instructions given for the guidance of the officers engaged in this investigation were, that, having so much of the Register as related to their respective parishes handed to them, they should place a tick opposite the name of every Elector coming within the description of *Mechanic, Artizan, or other Person supporting himself by daily manual labour.* A further direction was given that no Elector was to be excluded because he has a shop which is kept by his wife or other member of his family.

In the event of the Clerk finding that the Rate Collectors or Assistant Overseers were not the best qualified for the performance of the prescribed duty, he was requested to avail himself of the assistance of any other persons who might appear better able to render the services required.

Shortly after these Instructions were issued the Board became apprehensive, from inquiries which had been addressed to them, as well as from an inspection of some of the Returns which had been received, that there might be some misunderstanding as to the persons to be included in the Return; and in order to satisfy themselves that the Returns had been prepared without any misapprehension of their Instructions, they issued the following Circular:

" Poor Law Board, Whitehall, S.W.,
2d January 1866.

" Sir,

" I am directed by the Poor Law Board to acknowledge the receipt of the Return " Occupations of Voters," which you have been so obliging as to procure for them.

" The Board find, from communications which have been addressed to them, that in some instances there appears to be some misapprehension with respect to the persons intended to be included under the description of " mechanics, " artizans, and other persons supporting themselves by daily manual labour," and the Board are desirous of satisfying themselves that the Return received from you has been prepared without any misunderstanding of their intentions.

" The Board direct me to point out that the object of the Return is to show the Number of Electors on the Parliamentary Register now in force who would ordinarily be understood to come within the designation of " the " Working Classes."

" The Board do not intend that the Return should be exclusively confined to journeymen who are employed by masters at daily or weekly wages, but that it should include men who work daily at their own handicraft trade without a master, and even sometimes employ a journeyman or an apprentice, provided they derive their chief support from their own hand labour, and not from the labour of others, or the profits arising from the employment of capital, or the supply of materials.

" The Board have already stated in a note to the Form of Return that no artizan, mechanic, or labourer is to be excluded because he has a shop which is kept by his wife or other member of his family; but it must be distinctly understood, that, as a general rule, shopkeepers and their shop assistants are not to be inserted.

" The Board think it right to add that overlookers, superintendents, foremen, and others employed among or in connexion with operatives, workmen, or other daily labourers are not be included, unless actually employed in daily manual labour in the same manner in every respect as the men who are under them.

" The Board request that, having regard to the preceding explanation, you will have the goodness to inform them, if any, and if so, what alteration is required in the Return furnished by you.

" I am, Sir, your obedient Servant,

" **Enfield**, Secretary."

With very few exceptions, the Clerks in their replies to this Circular stated that they had not misunderstood the Board's intentions, and that the numbers returned by them were correct. In the exceptional cases referred to the Returns were sent back, and subsequently amended.

When the Returns had all been received it was found that the proportion of the Working Classes to the other Electors varied very considerably in different Boroughs; and wherever the proportion appeared to be in excess of the average number of that class on the Parliamentary Register for other Boroughs, and no satisfactory explanation of the circumstance could be collected from the Returns, the Clerk was requested to state whether there were any peculiar circumstances connected with the Borough, in consequence of the existence of manufactories or the general condition of the Working Classes themselves, which would account for a larger number than ordinary possessing the Franchise. The Clerk was at the same time informed that it had been ascertained that "in some instances such persons as small shopkeepers who " served in their shops, not being artizans or mechanics; butchers, who are " salesmen or keep a butcher's shop; farmers, who work themselves on the " land which they rent; dairymen, who live by the profits from their cows; " persons who keep a horse and cart, and let them out, &c., have been included " in the Return;" and the Register was forwarded to him with a request that the occupation of the Voter should be inserted in every case where his name had been ticked off as belonging to the Working Class.

The Registers containing the additional information required have since been examined, and the Returns, where necessary, revised.

Letters of inquiry have also been addressed to the Union Clerks in those cases where the number of Working Men has appeared to be unusually small.

The Borough Summary, which accompanies the Return, contains the substance of the explanations which have been received in relation to the points just referred to.

Return C.

Municipal Electors or Burgesses.

The object of this Return is to furnish a basis for the comparison of the Parliamentary with the Municipal constituencies in Boroughs. It shows the Number of Electors on the Parliamentary Register, the Number of Burgesses on the Burgess List, the Number of such Burgesses whose Rates are assessed on the Owner or compounded for by him, and the Number who are on the Parliamentary Register; at the same time indicating whether the Parliamentary and Municipal boundaries are conterminous or not.

The Burgess Returns have been furnished by the Town Clerks of the several Boroughs. The numbers are taken from the Burgess Lists for the present year, but the double entries have not been deducted, in consequence of the difficulty of identifying the Electors in those Boroughs where the number is very great. In order that the comparison between the two constituencies might be made upon the same data, the Number of Parliamentary Electors, as shown in this Return, is also inclusive of double entries.

Return D.

In explanation of this Return it should be stated that there are two General Acts authorizing the rating of the owners of small tenements instead of the occupiers—

Small Tenements and Local Rating Acts.

1. The 59 Geo. 3. c. 12., with a rating limit not exceeding 20*l.* nor less than 6*l.* annual rental : 59 G. 3. c. 12.
2. The 13 & 14 Vict. c. 99., usually known as "The Small Tenements Act," with a rating limit not exceeding 6*l.* annual rateable value. 13 & 14 Vict. c. 99.

These Acts are not compulsory, and it rests with the vestry of each parish to determine whether the Acts shall be adopted or not.

There is a distinction, however, between the powers of the vestry with respect to the rating limit. Under the first Act—the 59 Geo. 3. c. 12.—the vestry may fix the limit at any amount not less than 6*l.* nor more than 20*l.* Under the 13 & 14 Vict. c. 99. they have no such discretion; but if they resolve that the Act shall be adopted, all Tenements, the yearly Rateable Value of which shall not exceed 6*l.*, are necessarily brought within its provisions.

The 59 Geo. 3. expressly enacts that the owner shall not be rated in places where the right of voting for Members of Parliament depends on rating ; but there is some doubt whether this enactment applies to boroughs created since the passing of the Reform Act of 1832.

Besides these two General Acts there are several Local Acts authorizing the rating of owners instead of occupiers.

The occupiers of tenements for which the owners are rated are usually described as "Compound Householders."

Compound Householders.

The present Return (D.) shows—

1. The number of Boroughs in which the Small Tenements Act, 13 & 14 Vict. c. 99., is in force throughout the whole Borough :
2. The Boroughs in which the Act is in force but not throughout the entire area of the Borough :
3. The Boroughs in which the Act has not been adopted, distinguishing those in which any Local Rating Act is in force :
4. The Boroughs in which the Small Tenements Act and also a Local Act or Acts for rating are in force :
5. The Boroughs in which the provisions of the 59 Geo. 3. c. 12. s. 19. have been adopted throughout the whole or part of the area :
6. The Boroughs in which Local Acts for the rating of owners instead of occupiers are in force, with a column showing the limits of rental or value to which such Act applies.

This Return has been partly compiled from the Parliamentary Paper No. 33. (1862) and partly from information subsequently obtained by the Poor

Law Board, and a careful examination of the several Local Rating Acts in force in the different Boroughs.

Qualification for a Burgess.

In order to understand the effect of the several General and Local Rating Acts upon the Municipal Franchise, it must be remembered that the following qualifications are required for a Burgess :—

1. That he should have occupied for two years and eight months a house, warehouse, counting-house, or shop within the Borough :
2. That he should have been an Inhabitant Householder within the Borough, or within seven miles, during the period of his occupation.
3. That he should have been rated for the Relief of the Poor in respect of the premises so occupied, and paid all rates except those becoming due within the preceding six months.

5 & 6 W. 4. c. 76.

At the time of the passing of the Municipal Corporation Act in 1835, the 59th Geo. 3. c. 12. had been adopted in some Boroughs, and in several others Local Rating Acts were in force. In order, therefore, that the occupiers of property for which the owner was rated might not be excluded from the Franchise the Municipal Corporation Act provided that the occupier may claim to be rated, and that upon paying or tendering the full amount of the last rate payable in respect of the premises occupied by him he shall be deemed to have been rated from the date of that rate.

In 1850 the 13 & 14 Vict. c. 99. (the Small Tenements Act) was passed, and during its progress through Parliament a clause was inserted in it to the effect that where the owner was rated instead of the occupier under its provisions, and the owner should have paid the rates, the occupier should be entitled to the Municipal Franchise in the same manner as if he himself had been rated and paid the rates.*

By the 21 & 22 Vict. c. 43. a similar provision was made in regard to the Municipal Franchise in those Boroughs in which the 59 Geo. 3. c. 12. was in force.

The following distinction must, therefore, be borne in mind with respect to the Municipal Franchise so far as regards the condition of rating in those Boroughs where statutory provisions are in force for rating owners instead of occupiers.

In the Boroughs where either or both of the General Acts for rating Small Tenements have been adopted Compound Householders are exempted from the necessity of being rated or claiming to be rated. Their names need not appear in the Rate Book at all, and if the owner has paid, or they, in default of payment by him, have paid all the rates except those due within the preceding six months, they will be entitled to be placed upon the Burgess Lists. The law, however, is different where the owner is rated under a Local Act, except in one or two Boroughs where the Local Act contains a saving clause similar to those already referred to ; with these exceptions the Compound

---

* The 14 & 15 Vict. c. 39., passed in the following year, provided in like manner for the protection of the ancient Parliamentary Franchises reserved or retained for Freemen and others by the Reform Act.

Householder whose name has been omitted from the rate must still claim to be rated, and if necessary renew his claim with each succeeding rate during the whole of the prescribed period of occupation.

The Abstracts appended to Return D. are limited to the Municipal Statistics of those Boroughs which have the Parliamentary and Municipal Boundaries conterminous.

Abstract 1. shows the Boroughs in which the Small Tenements Act has been either wholly or partially adopted, and it supplies, from the Report of the Select Committee of the House of Lords on the operation of that Act (see Parliamentary Paper No. 46, 1859), the number of Burgesses on the Lists before the Act was adopted as contrasted with the number having the Franchise at the present time.

Abstract 2. relates to those Boroughs in which Local Rating Acts are in force.

Abstract 3. relates to those Boroughs in which there is no Statutory provision for rating the owners instead of the occupiers.

These abstracts are intended to show the effect of the Small Tenements Act and the Local Rating Acts in diminishing or increasing the Municipal Constituencies.

Return E.

Male Occupiers.

This Return furnishes the Number of Male Occupiers in Boroughs who are assessed upon a Gross Estimated Rental, and Rateable Value at various fixed Amounts, commencing at 4*l.* and extending upwards; the Number of Inhabited Houses in 1861; and the Number of Electors on the Parliamentary Registers now in force as £10 Occupiers.

In 1860, Returns almost similar to these were presented to both Houses of Parliament, and they afterwards formed the subject of investigation by the Select Committee appointed by the House of Lords, to inquire what would be the probable increase of the Number of Electors in the Counties and Boroughs of England and Wales from a reduction of the Franchise.

The Returns of 1860 were taken from the Rate Books, and it was established by the Evidence taken before the Committee, that under the then existing system of Rating the data furnished from that source could not be relied upon as satisfactory evidence of value.

The Union Assessment Committee Act, 1862.

Since that time Mr. Villiers' Union Assessment Committee Act has been passed. Under its provisions the Poor Law Guardians are required to appoint an Assessment Committee, one third being ex officio Guardians, to regulate and settle a uniform valuation of all the assessable Property in the several Parishes of their respective Unions.

Valuation Lists.

The documents in which these Valuations appear are termed Valuation Lists, and the Act requires that they shall set forth the names of the Occupiers and Owners of the Property assessable, and the Estimated Extent, the Gross Estimated Rental, and the Rateable Value of each separate Occupation.

Gross Estimated Rental.

The Gross Estimated Rental is defined to be the Rent at which the Property might be reasonably expected to let from year to year, the tenant taking upon himself all tenant's rates and taxes, and the Tithe Commutation Rentcharge, if any.

Rateable Value.

The Rateable Value is the Amount of such rent, deducting therefrom the probable average annual cost of the repairs, insurance, and other expenses, if any, necessary to maintain the premises in a state to command such rent.

Objections to Valuation Lists.

The Valuation Lists are in the first instance made out by the Overseers, and delivered in duplicate to the Assessment Committee. Any Ratepayer in either of the Parishes of the Union, may, if aggrieved by his Assessment, object to it, and the Assessment Committee are empowered, with the consent of the Guardians, to direct a Revaluation of all or any of the Parishes within their Union. After the Valuation Lists have been finally approved of by the Assessment Committee, one copy is delivered to the Guardians, and another remains in the custody of the Clerk to the Guardians.

Appeal against Rate.

The Valuation Lists are not conclusive, and any person who is dissatisfied with the decision of the Assessment Committee may afterwards appeal against the Rate to the Special or Quarter Sessions, and the Judgment of the latter may be reviewed in the Queen's Bench in the ordinary way.

No Rate for the Relief of the Poor can be enforced unless the property included in it is rated according to the annual Rateable Value appearing in the Valuation Lists. Moreover, the Overseers are required to sign a declaration at the foot of the Rate that the several Hereditaments are rated according to the Value appearing in the Valuation List; and any Overseer who wilfully makes such Declaration falsely incurs a Penalty not exceeding £5.

There are in England and Wales 652 Unions, including about 71 places under Local Acts and Gilbert's Act (22 Geo. 3. c. 83.), and also a few Parishes under separate Boards of Guardians. To these separate Parishes the Union Assessment Committee Act does not apply, but the Unions and Incorporations under Local Acts or Gilbert's Act are empowered to adopt its provisions, with the consent of the Poor Law Board, and four of them have already done so.

The Number of Parishes and Townships in England and Wales is about 15,000. Prior to the passing of the Union Assessment Committee Act very great variations were found in the mode of Assessment. In many instances the difference between the Gross Estimated Rental appearing on the Rate Book and the actual Rental was from 20 to 30 per cent., whilst in other cases it amounted to no less than 50 per cent. The discrepancies between the Rateable Value and the Gross Estimated Rental were equally great.

The Act to regulate Parochial Assessments (6 & 7 Will. 4. c. 96.) provided that no rate should be allowed by the Justices which should not be made upon an estimate of the net annual Value of the several hereditaments rated thereunto, that is to say, the rent at which the same might reasonably be expected to let from year to year, free of all usual tenant's rates and taxes, and Tithe Commutation Rentcharge, if any, and deducting therefrom the probable average annual cost of repairs, insurance, and other expenses, if any, necessary to maintain them in a state to command such rent. In practice, however, this enactment was often disregarded by the Overseers, who had an object in reducing the assessable value of the property within their Parish, in order that they might lessen the contribution to the County Rate, and so long as the Overseers and Parishioners were satisfied with the rating there was no remedy for the irregularity. If the Overseers were willing to sign the Statutory Declaration that the Rate was correct, the Magistrates had no alternative but to allow it, their duty being merely ministerial; and if the Parishioners were rated fairly, *inter se*, they had no motive whatever for appeal.

The Parochial Assessment Act.

Since the passing of the Union Assessment Committee Act in 1862, Assessment Committees have been appointed in 581 Unions, and in 503 of them the Valuation Lists have been completed.

Under the new system, all the Parishes in the same Union must necessarily be assessed upon the same principle; and although the Returns show that the scale of deduction from the Gross Estimated Rental is not always uniform as between different Unions, it will be observed that the Union Clerks, with very few exceptions, state that the Gross Estimated Rental represents the full rack rent.

The total number of Parliamentary Boroughs in England and Wales is 200, and the Act is in force in all of them with the exception of 31. The names of these Boroughs are printed in the Return in larger type in order that they may be distinguished from the rest.

The Return E., as will be seen by reference to it, shows the number of Male Occupiers assessed in the Gross Estimated Rental Columns and the Rateable Value Columns of the Valuation Lists at certain stated amounts, commencing with 4*l.* and extending upwards. In those cases where there are no Valuation Lists the particulars required have been extracted from the Poor Rate.

The number of Occupations at a Gross Estimated Rental has been taken chiefly from the Return moved for by Mr. Baines at the close of the last Session, and recently presented to the House of Commons, but no deduction has been made in the present Return on account of Female Occupiers and unoccupied property in those places where the number of Tenements and not the number of Male Occupiers only is given.

Parliamentary Return, No. 81, 1866.

The Statistics with regard to both the Rental and Rating Occupations have been supplied by the Union Clerks, except in those few instances of Parishes not under a Board of Guardians, when the Forms have been filled up by the Vestry Clerks or the Overseers.

A considerable portion of the information contained in Mr. Baines's Return was obtained early in the autumn, but the circulars applying for the number of Rating Occupations were not issued until the 30th of November. It is proper to mention this circumstance, as it has been ascertained that, in a few Unions, to which the Union Assessment Committee Act is applicable, the number of Rental Occupations was taken from the Poor Rate in consequence of the Valuation Lists not being at that time complete, whilst in others the Supplemental Valuation Lists from which the Rating Occupations are enumerated had been approved since the number of Rental Occupations was given in.

Instructions for Return.

The following are the instructions which were issued for making out the Return of Rating Occupations:

" INSTRUCTIONS for making out the Return.

" The object of this Return is to ascertain, with the greatest possible accuracy, the Number of MALE PERSONS *resident within the Parliamentary Borough, or within seven miles thereof*, who are assessed in the last Poor Rate, as OCCUPIERS of *a House or other Building, with or without Land*, within the Borough, the RATEABLE VALUE of which is *at and above* 4*l.*, classified according to the accompanying Form :—

" 1. The Number of MALES only is required. All *Women* entered as Occupiers are therefore to be excluded.

" 2. The Number of PERSONS only is required. Where, therefore, one Person is assessed within the Borough for several of such tenements he will be only entered once, and that in respect of the tenement of the highest value.

" 3. It is only the Number of Persons *resident within the Parliamentary Borough, or within seven miles thereof*, that is required. Any Person, therefore, who may be assessed in the Rate in respect of a tenement occupied by him within the Borough, but who does not reside within the above-mentioned limit, must be excluded from this Return.

" 4. It is only the Number of OCCUPIERS that is required. All tenements, therefore, must be wholly omitted from the Return which are entered as *unoccupied*.

" Also where, under the operation of the Small Tenements Act or any local Act, the *Owner* is assessed instead of the *Occupier*, it is the OCCUPIER who alone must be entered in this Return, according to the rateable value of the tenement which he occupies. If the names of the Occupiers of these tenements do not appear upon the Rate, so that the number of female Occupiers cannot be ascertained, the number of tenements must be entered as the number of Occupiers, and a note stating when this is the case should be added to the Return.

" 5. When several persons are *jointly assessed* in respect of a single tenement they should be entered as *separate Occupiers* of tenements, calculated at a proportionate part of the whole value of the single tenement. Thus, if A., B., and C. are assessed jointly for a tenement, the rateable value of which is 21*l.*, each of these ought to be entered as an Occupier of a tenement at a rateable value of 7*l.* If either of them is a female, or resides more than seven miles from the Parliamentary Borough, such Occupier must be excluded.

" 6. Especial care must be taken, in cases where *part* of a Parish is *within* and *part without* the Parliamentary Borough, that only such Persons as are assessed in respect of *tenements within the Parliamentary Borough* shall be included in this Return.

" *Poor Law Board, Whitehall,*
" 30 *November* 1865."

Instructions almost similar to the preceding were given for the preparation of the Return of Rental Occupations.

Houses let in distinct Tenements.

In the Metropolis, and in a few other large towns also, there are certain houses which are let out in separate Tenements or Floors, the landlord himself not residing on the premises, but being rated for the whole house. In these cases the tenants' names seldom appear on the Rate, or if they are entered on the Rate there is nothing to indicate the number or value of the separate Occupations. There was reason to presume that such houses as these would appear in the Valuation List, or Rate, as above the Rateable Value of 10*l.* each, and be entered accordingly in the Returns. A Circular was therefore addressed by the Poor Law Board to the Union Clerks and Parochial Officers of every Borough, with a Population exceeding 50,000 Persons, requesting them to state whether in the Return furnished by them there were any, and if so, how many Houses of the description referred to. They were also requested to state whether it would be practicable, without a house-to-house visitation, to ascertain or estimate the Number of such separate Occupations, and the Annual Value of each; and they were reminded that the Board did not refer to those cases where the owner himself resides on part of the premises, or where a tenant takes the whole house, residing in part himself and sub-letting the remainder to lodgers.

The replies to this Circular show that houses let out in distinct Tenements in the manner described are chiefly to be found in the Metropolis.

The information which has been obtained with respect to these houses, where they are found to exist, is given in the Borough Summary referred to hereafter.

It will be observed on comparing the number of Rental Occupations at 10*l.* and over with the Number of Electors on the Register that in some Boroughs the number of the latter is in excess of the former. Whenever this has appeared to be the fact the cause of the variation has been inquired into, and the substance of the explanation in each case is likewise given in the Borough Summary.

In computing the probable addition to the constituency of any Borough by an extension of the Franchise to any given amount of Rental, or Rateable Value, reference should be made to the Borough Summary to ascertain whether the assessment in the Valuation Lists or Poor Rates is made upon a proper basis, and whether the deductions in order to arrive at the Rateable Value appear to be insufficient or excessive.

In forming an estimate for the Metropolitan Boroughs it must be borne in mind that in several Parishes the Gross Estimated Rental of Compounded Houses is *inclusive* of all Tenants rates, which are paid by the Landlord, and the Rateable Value, instead of being calculated upon the principle laid down by the Parochial Assessment Act, is entered at one half of such gross rent.

Return F.

Poor Rate and Income Tax Assessments.

This Return shows the Gross Estimated Rental and Rateable Value according to the Valuation Lists, or last Poor Rate, of all Rateable Property within the several Parliamentary Boroughs as compared with the Gross Estimated Rental and Rateable Value of the same property at Lady Day 1856; the Gross Estimated Value, according to the last Income Tax Assessment under Schedule A., omitting Mines, Railways, and other properties assessed upon Profits, and the Gross Estimated Rental of the same Property, with a similar omission according to the Valuation Lists or last Poor Rates.

By the aid of this Return a comparison may be instituted between the present system of Assessment to the Poor Rate and that which existed prior to the passing of the Union Assessment Committee Act; and the Valuations upon which the Poor Rate is now based may be tested with the estimate of value arrived at by the Income Tax Commissioners. The most recent Return showing the Gross Estimated Rental, and Rateable Value prior to 1863, is the Return No. 124 (1860), which is taken from the Poor Rate Assessment in existence at Lady Day 1856. A later Return could not have been procured without communicating with the Overseers of each Parish, but this would have occasioned great delay, and it is probable that in some Parishes the Rate Books for 1862 would not have been in their possession.

The Income Tax Returns have been obtained through the Inland Revenue Department.

In order to afford a basis of comparison between the totals of these Returns and the totals of Gross Estimated Rental given in Valuation Lists, it has been necessary to eliminate from the latter the following Rateable Properties, which form the subject of separate charge in the Income Tax Assessment, viz., 1. Railways; 2. Quarries; 3. Mines; 4. Ironworks; 5. Canals; 6. Gasworks, and 7. Docks, Salt Springs, Alum Works, Waterworks, Telegraphs, Tolls, Ferries, and Bridges. But even with these deductions it will be found that in some instances the comparison is not based upon precisely the same data, as the Income Tax Assessment sometimes includes properties which are not rateable to the Poor Rate.

Another difficulty has arisen in consequence of the area of the two assessments not being always the same.

When the discrepancy between the two valuations has been large every effort has been made to correct or explain the variations by means of a conference between the Union Clerks and the Local Surveyors. The explanations which have been obtained upon these points appear in the Borough Summary already referred to.

It may not be irrelevant to remark that the Income Tax Assessment is usually made upon the extreme rack rent paid, without any allowance or deduction, whereas the valuation of the Assessment Committee is based upon an *estimate* of the rent at which the property might *reasonably* be expected to let *communibus annis*.

Borough Summary.

This Summary supplies under the head of each Borough the whole of the particulars contained in the preceding Returns. It also shows the Population in 1861, and the Rateable Value immediately prior to the passing of the Union Assessment Act, which the Union Clerks were enabled to state from the information obtained by them for the purpose of distributing the common charges over the property in the several Parishes of the Union, in conformity with the 24 & 25 Vict. c. 55., which was passed on 1st August 1861.

The Summary also gives a short abstract of the Local Acts in force in particular Boroughs for rating Owners instead of Occupiers. It states whether the Gross Estimated Rental represents the full rack rent, and shows the scale of deductions adopted in estimating the Rateable Value of Houses at and under 10*l.*

It also contains explanations of the discrepancies which appear on the face of some of the other Returns.

The Total of the Male Occupations in each Borough at a Gross Estimated Rental is given for the purpose of comparison with the number of Inhabited Houses in 1861.

Return G.

Counties.

Population, Male Occupiers, and Electors.

This Return gives the Population in 1831 and 1861; the Number of Male Occupiers of a house or building, with or without land, at various *rateable* values, commencing at 10*l* and extending to 50*l.*; the Number of such Persons who are Owners of the Property occupied by them; the Number of Occupiers of Lands or Tenements at a gross estimated Rental of 50*l.* and upwards, with the Number of such Occupiers who are Owners also, and the Number of Electors on the Register 1864–5 as Occupying Tenants at 50*l.* and upwards; the Gross Estimated Rental and Rateable Value of the Property in each County or Electoral Division prior and subsequent to the passing of the Union Assessment Committee Act, and the Total Number of Electors on the Registers for the Years 1832–3 and 1864–5.

The Population Returns are taken from the Parliamentary Paper, No. 283 (1864).

The Occupation Statistics have been extracted from the Valuation Lists or Poor Rates through the same agency as that which was employed in obtaining the Borough Returns.

It should be observed that the Union Assessment Committee Act is almost universally in force in the Counties, there being only about twelve Local Incorporations, chiefly under Gilbert's Act, and some few separate Parishes which have not adopted or are not within its provisions.

The population and area of these places are comparatively so small as to be unimportant. When therefore the Valuation Lists are complete they will include, with these exceptions, all the county constituencies of England and Wales. At present eight ninths of the Valuation Lists are complete, and the remainder, although not finally approved, are in a state of great forwardness.

The instructions given for the preparation of this part of the Return, so far as it relates to the number of Male Occupiers at 10*l.* and under 50*l.*, *Rateable Value*, are the same in effect, *mutatis mutandis*, as those already quoted with respect to Boroughs.

Occupiers of a house or building with or without land were the only ones to be counted. Where the same person was assessed for several properties he was to be entered but once, and then for the Property of the highest value, and all Persons occupying Property within the boundary of a Parliamentary Borough only were to be excluded.

It was intended to guard as far as possible against double entries in the same County or Electoral Division; but although the Union Clerks are able to check the double occupations in one or more parishes of the same Union, they cannot do the same in cases where the same Persons occupy Property in different Unions.

In estimating the Number of Male Occupations at 50*l.* and upwards, Occupiers of Land only, without any Building upon it, were to be included, and the Gross Estimated Rental was to form the basis of the Return, instead of the Rateable Value.

Supplemental Instructions were issued stating that the Object of this section of the Return is " To show the Number of Occupiers who might be " entitled to be placed on the Parliamentary Register as 50*l.* Occupiers of " Land or Tenements under the existing County Franchise;" and further that, When an Occupier is assessed at a Gross Estimated Rental of 50*l.* and upwards, and at a Rateable Value below that Amount, he must be included in the Column intended for the former class, and not amongst the Occupations at a Rateable Value.

It will be observed that with regard to the Occupations at Rateable Values under 50*l.*, those persons only were to be included who occupy a house or other building, with or without land, or, in other words, property of the description required in the case of the existing Occupation Franchise in Boroughs.

With regard to the Occupations at and over 50*l.* Gross Estimated Rental, the Male Occupiers of lands or tenements of every description were to be included, in order that a comparison might be made between the actual Number of Electors on the Register as possessing the existing 50*l.* Franchise and the total Number of Persons who appear to be entitled to it.

The Number of Electors on the Register, 1864–5, is taken from the Parliamentary Return, No. 448, 1865. This course was adopted in consequence of the late period at which some of the County Registers are printed;

but it is not likely that any material variation will be found between the Registers of last year and those of the present one.

For the reason already given in the explanation of the Borough Returns, the Parliamentary Return, No. 131, 1860, has been adopted for the purpose of showing the Gross Estimated Rental and Rateable Value of the property in each County and Electoral Division prior to the passing of the Union Assessment Committee Act.

Appended to the Return G. is an abstract showing the net number of Male Occupiers, exclusive, in all cases, of those who are both Owners and Occupiers.

At the end of the Returns will be found a List of some of the principal Parliamentary Papers relating to Electoral Statistics since the passing of the Reform Act. This List has been added for the convenience of reference.

* The population in 1831 is taken from Parliamentary Return No. 283 (1864).

† The Registrar-General states that there are no authentic materials in his hands from which he can estimate the probable population of each borough on the completion of the fifth year since the last Census, namely, on 8th April 1866. The estimated numbers given as the population in 1866 are derived from the ascertained ratio of increase or decrease in each case between 1851 and 1861. The increase or decrease is assumed to proceed in a geometrical progression; thus the enumerated population of Manchester was 316,213 in 1851, and 357,979 in 1861; consequently the annual rate of increase was 1·248 per cent., and if the population increased at the same rate after 1861 it would amount, on 8th April 1866, to 380,887. The same method is employed in all the other calculations. The results thus obtained can be correct only where the ratio of increase or decrease from 1861 to 1866 was the same as between 1851 and 1861. In many cases the numbers given will approximate to the truth, but in others they must be entirely erroneous.

‡ The total number of Electors, as given in this return, is *inclusive* of double entries. This course is adopted in consequence of the return for 1832-3, Parliamentary Return No. 189 (1833), not distinguishing double entries, except in a few instances. The number of Freemen, Scot and Lot Voters, and Electors possessing other ancient-right qualifications, are included in the totals, but the number so included is shown under each total. F. indicates Freemen. S. and L. Scot and Lot Voters, and A. R. other Ancient-Right qualifications.

§ In this and several other instances the £10 occupiers are not distinguished in the Return No. 189 (1833) from the Scot and Lot Voters, but all the Electors are returned under the latter qualification, although a large number of them must have been £10 occupiers also.

‖ The qualifications of the Electors are not distinguished in the Return No. 189 (1833), and the number of Electors in respect of Ancient-Right Qualifications is for 1836–7 taken from the Return No. 329, 1838.

* Until this year the occupiers of houses compounded for have been on the list, and last year the total number on the list was 1768. This year the Overseers List delivered comprised only the persons actually rated, and as there were no claims made the list remained as returned, hence the reduced number.

† But the difference affects only a very small portion of the Voters.

A deduction of 30 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses above £6. In the case of Houses at £4 and not exceeding £6 the deduction is one third of rental, and in the case of Houses under £4 the deduction is one half of rental.

---

* With reference to the excess of £10 Occupiers on the Register over the number of Male Occupiers at a Gross Estimated Rental of £10, it is stated that "many of the Electors of Ashburton are in companies, and are not rated at £10 each; in "other cases Owners are not rated at £10, although they swear the property is worth £10; and in other cases where the Rent "is £10 the Gross Rateable Value is much below that sum."

† When the Owners are assessed in lieu of the Occupiers, and the names of the Occupiers do not appear in the Rate Book, the number of tenements is given.

A deduction of 15 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at £10, and of 20 per cent. in the case of Houses under £10.

It is almost a universal rule for owners to pay all rates between a Rateable Value of over £6 and £7 16*s*. A deduction of 25 per cent. is made from the rent actually paid to cover the rates, so that a Weekly Rental of 4*s*. would represent a Gross Estimated Rental of £7 16*s*. or a Rateable Value of £6 2*s*.

* It is stated that cotton mills within the borough are assessed to the property tax at something like 25 per cent. more than their present value to let. In the case of mills not working at all, the assessment to the Poor Rate has been reduced in accordance with a recent decision of the Court of Queen's Bench. There are also one or two instances of large mills from which the fixtures, including engines and machinery, have been removed, and the premises are not rateable in consequence.

† In explanation of the number of Male Occupiers at £10 and over, Gross Estimated Rental, being less than the number of Electors, it is stated that there is a large number of houses in the borough at a fixed weekly rental of what is considered sufficient, after deducting the Rates, to leave a net annual sum of £10, but which are only valued in the Valuation List at from £9 to £10, sums quite as much as the property is worth to let. It is believed that there are a great many on the List who really do not pay £10 a year clear of all rates and taxes.

In 13 parishes a deduction of 15 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of new cottages at and under £10, of 20 per cent. for those in fair repair, and of 25 per cent. for thatched or dilapidated cottages. In 12 parishes the deduction varies according to the nature of the property; but in no case is it less than 10 or higher than 25 per cent., and in two parishes a deduction of 20 per cent is made.

---

* With reference to the parishes in the Aylesbury Union, it is stated that the assessment on Woodlands is not included in this amount. Also that the Income Tax Assessors receive from the occupiers a return of the actual rent paid, which in many cases may exceed the Gross Estimated Rental fixed by the Assessment Committee who take the rent as the criterion of value when it is known to them, but are not entirely guided by it, if, from the circumstances of any particular case, in their opinion the property is let too high, or, on the contrary, would reasonably be expected to let from year to year for more than the rent. The Valuation Lists in some of the parishes were made two or three years ago.

* The reasons why a larger number of the Parliamentary Electors are not on the Burgess Lists are stated to be (1) the difference between the two franchises (the Municipal Franchise requiring that the voter should be an inhabitant householder, and that he should have occupied and been rated for two years and eight months; and (2) that more than 50 of the Freemen are not occupiers in the borough, and that others are not householders.

---

* It appears that in addition to the number of Male Occupiers included in the Return, there are assessments upon Owners under the Small Tenements Act, as follows:—at £4 and under £5, 65; at £5 and under £6, 51; at £6, 19; above £6 and under £7, 14; at £7 and under £8, 29; at £9 and under £10, 19; and at £10 and over, 65. These assessments are on groups of tenements, each assessment representing one or two houses, let off in tenements, mostly consisting of one room only, the whole being occupied by from 15 to 20 or even 30 different families. In the cases in which the Owners compound, the Rateable Value is entered in the Valuation List at less than one-half of the Gross Rental. The full Rateable Value of the tenements could not be estimated without first ascertaining the rent actually paid in each case.

* In Birkenhead there are no works of any consequence in which men are employed in manufacture, except highly skilled and well-paid artificers with wages from 40*s.* to 60*s.* per week. Rents are stated to be exceptionally high, involving the necessity of operatives unskilled and labourers occupying houses in common of a rent sufficiently high to give a vote to one, whereas if rents were lower each family would be occupying a house under £10.

† With reference to the excess of Male Occupiers at £10 Gross Estimated Rental over the £10 Occupiers on the Register, it is stated that it is accounted for by the disqualification of police officers, letter carriers, excise officers, paupers, and persons excused payment of rates on the ground of poverty, and those not on the Rate Book for twelve months. Persons are constantly removing between Birkenhead and Liverpool on account of convenience as regards employment. Mariners also who are not at home at the revision of the List by the revising barrister are generally struck off in consequence of an objection being taken against them by their opponents in politics.

‡ The Dock Cottages in Birkenhead are let out in flats, but the occupiers of the flats are separately assessed.

In Birmingham, the Gross Estimated Rental represents the Annual Value, the Landlord paying for Insurance, Repairs, &c. In Edgbaston, the Gross Estimated Rental represents the full rack-rent, except when the Landlords make the local payments, and then 20 per cent. is deducted. In the part of the Parish of Aston within the Borough, it is from 15 to 20 per cent. less than the full rack rent.

In Birmingham a deduction of 25 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10. In Edgbaston the deduction is 20 per cent. In Aston, in the case of compounded houses up to and inclusive of £5 Gross Estimated Rental, the landlord paying tenant's rates, &c., the deduction is 25 per cent., and for houses from £5 to £10, 20 per cent.

---

* The return of the Working Classes on the Register in the parish of Birmingham is based on an estimate. There are 3,252 Voters who are the Occupiers of Tenements from £10 to £15 Gross Estimated Rental (the whole of this class being compound property), and of these 795 names were taken and canvassed, and it was found that 50 per cent. are Mechanics, Artizans, &c. Of the 3,017 Voters above £15 Gross Estimated Rental 4¼ per cent. were found to be Mechanics, &c., a canvass being made in the cases in which the Occupations were not known.

† With reference to the excess of Male Occupiers at £10 Gross Estimated Rental over the Electors, it is stated that the discrepancy in the parish of Birmingham arises from the fact that the residence of some of the Occupiers has not been of sufficient duration to enable them to be placed on the Register. It is accounted for in the part of Aston included in the borough by the frequent removal of tenants from houses at rentals of about £10 or £12, very few claims being made by Voters for successive occupations.

‡ With reference to Aston it is stated that the names of the Occupiers of small tenements in respect of which the Owners are rated do not as a rule appear on the Rate Book. About three years ago, however, the name of every Occupier was ascertained, and it was found that the void houses and those occupied by women constituted about one fifth and a half of the total, and the numbers given in the return have been calculated on that proportion of deduction in each class.

On an average a deduction of about 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10.

A Rateable Value of £6 10*s.* represents yearly rentals of £8 5*s.*, £8 10*s.*, and £8 15*s.*

---

* The difference between the two assessments to the extent of £6,000 or £7,000 it is stated is attributable to the fact that in fixing the amount of the Gross Estimated Rental in respect of cottage property of £6 rating and under, of which there is a vast quantity in Boston, an allowance is made from the rack rent for poor and other rates paid by the landlord, whilst the Income Tax Assessment represents the full Gross Rent paid to the landlord without any deduction whatever. In the parish of Skirbeck the land appears to have been rated at sums varying from £2 to £3 per acre, whilst the rents actually paid are £4, £5, and £6, and in some few instances £7, per acre. Interest of monies charged upon places of worship, and which is assessed to the Income Tax, is not assessable to the Poor Rate.

* It is stated that from the way in which the Burgess Lists are made out the names on the Parliamentary Register are on the Burgess Roll. "The overseers are not mindful to make a Return of those persons only who may have occupied a house, counting-"house, or shop during the necessary period; but if a person be a ratepayer in respect of property of another description, he is "invariably placed upon the Burgess List, and very rarely are any objections made at the revision."

The Parish of Bridgwater has adopted the Small Tenements Act, but it is not in force in the Parishes of Wembdon and Durleigh.

Until this year the Occupiers of Houses compounded for have been in the Burgess List, and *last year* the total number on the List was 1,768. *This year* the Overseers List comprised only the persons actually rated, and as there were no claims made the List remained as returned, hence the reduced number.

In the Parish of Brighton a deduction of 15 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10, and in the Parish of Hove the deduction is 20 per cent. in the case of Houses above £6, and 25 per cent. under £6.

* There are nearly 1,500 men employed in the railway workshops, exclusive of engine drivers, stokers, and porters, and upwards of 500 of them are on the Register, and come within the description of artizans, &c. The town, as the resort of many thousands of visitors, employs a very large number of mechanics of all trades, especially tailors, shoemakers, journeymen butchers, bakers, &c. The amount of building that has been going on for 10 years also has found occupation for a vast number of bricklayers, plasterers, masons, carpenters, &c.

† With reference to the excess of Male Occupiers at a Rateable Value of £10 over Electors on Register it is stated that 1,634 are Compound Occupiers, that persons of that class frequently change their place of abode, and that a great many of them never make a claim to be placed on the Register. 420 houses have been recently erected, and have not been occupied sufficiently long to confer a vote.

‡ In Brighton parish the return includes the number of tenements rated to the Owners instead of the Occupiers, after a deduction for Female Occupiers. There are two houses let out in flats. The occupations are as follows :—20 at £3 14*s.* Gross Estimated Rental, 12 at £4 5*s.*, 1 at £12 10, and 2 at £17 10*s.*

§ The difference between the two assessments is accounted for as follows :—The Income Tax Assessment is founded on a return of the actual amount of rent paid by the occupier ; the assessment to the Poor Rate is based on an estimate of the rent. The assessment to the Income Tax is revised at least once in three years, and consequently has the advantage of any increase in value of property that may occur in the interval, whereas the assessment of the great majority of properties to the Poor Rate continues comparatively unchanged, except in cases where the property is palpably improved or rebuilt. It is also well known that in many instances the assessment to the Income Tax is in excess of the actual rent paid, more especially in cases of property let on lease for a term of years.

Another Local Act, 2 Will. 4. c. 89., is in force in the united Parishes of St. James and St. Paul, the rating limit being £12, with a similar exception.

In the City of Bristol a deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10. In the Parish of Bedminster the deduction is 20 per cent. in the case of Houses at £8 and under, and 15 per cent. above £8. In the Parishes in the Clifton Union the deduction is 20 per cent. on Houses under £10, and 15 per cent. at £10 and over.

---

* These numbers are estimated upon a comparison of the Lists for certain parishes and the Lists of Freemen and Freeholders.

† It is stated that there are very many manufacturing and other trade establishments in Bristol, employing large numbers of men of the Working Class, many of whom are £10 occupiers; also that the political associations are very active in securing the registration of such of their adherents as are qualified.

‡ In the under-mentioned cases in the City of Bristol the names of the Male Occupiers (Rateable Value) do not appear on the rates, and the number of tenements is given,—

At £4 and under £6	1,306	At £8 and under £9	273
At £6	479	At £9 and under £10	79
At £7 and under £8	276	At £10 and over	45

There are 70 houses (40 above £6) let out in distinct tenements. A house-to-house visitation would be necessary to ascertain the number and value of the separate occupations.

In the case of compounded tenements the augmentation of the rent to cover the rates is estimated at rather more than 25 per cent.

* Scarcely any kind of manufacture is carried on within the limits of the borough. The district is purely agricultural, and those of the population who may be described as mechanics, artizans, &c. for the most part occupy houses of less value than £10.

† With reference to the excess of Electors on the Register as £10 Occupiers (391) over the number of Male Occupiers at £10 Gross Estimated Rental (387) it is suggested that there may be cases in which a person, who has paid a rate but has not been nominally rated (a Joint Occupier for instance), has been placed on the Register, and that there also may have been cases occasionally in which claims have been admitted when the properties have been rated at less than £10.

In 6 Parishes the deduction is from 20 to 25 per cent., and in 6 from 15 to 25 per cent.

---

* There being no Poor Rate in the five small extra-parochial places in the City, the returns for these places are based on the Borough Rate. ---

* The difference between the two assessments is accounted for by a great portion of the property being now let for much higher sums than those entered in the present Poor Rate Valuation. It is stated that the amount according to the Union Assessment Valuation, when completed, will probably be about the same as the Income Tax Assessment, Schedule A.

† Where the landlord pays all rates, and for water, 15 per cent. is taken off in estimating the Gross Rental. For instance, A pays 3*s.* 6*d.* a week or £9 2*s.* per annum clear of rates ; deduct 15 per cent., which leaves £7 14*s.* 9*d.* Gross Estimated Rental and £6 3*s.* 9*d.* Rateable Value.

* With reference to the number of the Working Class on the Register it is stated that the number of Gardeners is large, owing to the business of seed growing, &c. being carried on to a considerable extent. Bakers who have been included, and who have shops, do their own work and carry out their own bread, in some cases perhaps with occasional assistance. Many keepers of Publichouses and Beerhouses are very commonly engaged in some other occupation of labour, or are men of the Working Class who are put into the houses by the Brewers and Merchants to retail beer rather as their servants than in any other capacity, of course doing all the work incidental to the business.

† With reference to the difference between the two assessments it is stated that in the Parishes in the Malmsbury Union there has been a very considerable increase in the Income Tax Assessment for 1864–5, whilst no corresponding increase has been made in the Valuation Lists. As regards the Parishes in the Cirencester Union, the difference is accounted for by the lower rate at which house and cottage property is taken in the Poor Rate. Owing to the extensive area comprised in this Borough great difficulty has been experienced in comparing the two Assessments, and the comparison is still very imperfect.

---

* The large proportion of the working classes on the Register is accounted for by the fact of a large number of artizans being employed in the Royal Dock and Keyham yards.

† With regard to the parish of East Stonehouse it is stated that the difference between the number of Male Occupiers at £10 and over, Gross Estimated Rental, and the number of Electors is occasioned by the breaks in occupation and a large number of persons being struck off the Register by the Revising Barrister for various reasons, the chief one being the non-qualification of Government Officials at the Royal Marine Barracks, Royal Naval Hospital, and Royal William Victualling Yard. With regard to Stoke Damerel it is stated that in that parish many hundreds are struck off the Register by the Revising Barrister annually.

---

* In consequence of the great public works carried on for some years past, such as Fortifications, Admiralty Pier, Improvement of the Harbour, and Termini of two Railways, there has been a great influx of the working classes into Dover.

† In explanation of the difference between the number of Male Occupiers at £10 Gross Estimated Rental and the number of £10 Occupiers on the Register it is stated that the greater portion of the Freemen are residing in houses included in the 2,340 rated at £10 and upwards, also that a great number of houses have been lately erected, the occupation of which has not been sufficiently long to qualify.

‡ The difference between the two assessments is attributed to the fact that the charge for the Income Tax is levied on the actual rent, whereas the Poor Rate Assessment is on such a rental as the Overseers and the Assessment Committee consider to be fair.

* In the parishes in the City it is stated that in some instances there appears to be great irregularity in the Poor Rates which are not made upon the actual rental.

† With reference to the excess of Male Occupiers at £10 Gross Estimated Rental over the Electors on Register as £10 Occupiers it is stated as regards Exeter that many of the Occupiers had not rented a sufficient length of time, and that many are rated at £10 who do not pay that sum. As regards the parishes in St Thomas's Union included in the City it is stated that many persons who are placed on the Lists by the Overseers, being objected to, are struck off, as they do not attend the Revision Court to prove their qualifications, and that a considerable number of the tenements which are rated at £10 and upwards are not occupied solely by the persons rated.

Clerkenwell.—A deduction of one fourth is made from the Gross Estimated Rental in ascertaining the Rateable Value. There are a large number of houses let out in separate apartments or floors for which the landlord is rated, but the names of the tenants or lodgers are never entered in the Rate Book. In some instances the landlord lives out of town, but retains an office, counting-house, or workshop in which he transacts business in the daytime. The compound householders are entered by the Collectors on the Register in almost every case, and it is stated that there are even occupiers of houses of £8 rental on the Register of Voters.

---

* The return of the number of the Working Classes on the Register for the parish of St. Luke is based upon an estimate. It was ascertained by careful examination that the number on one half of the Register was 269, and 538, or double that number, was inserted in the Return.

Holborn Union.—The parishes and places comprised in this union which are included in the borough are Furnival's Inn, Saffron Hill, Hatton Garden, Ely Rents, Ely Place, St. Andrew, Holborn-above-the-Bars, and St. George-the-Martyr, St. Sepulchre, Staple Inn, and Lincoln's Inn.

The Gross Estimated Rental in all the parishes, with the exception of Lincoln's Inn, represents the full rack-rent. The assessment of Lincoln's Inn is made under an Act of Parliament which fixes the amount to be paid as the contribution of the Inn. There is no fixed scale of deductions in arriving at the Rateable Value. The Rateable Value in the case of compounded tenements is not the true Rateable Value, but only the reduced value in respect of which the Landlord is charged.

There are 747 compounded houses, of which 682 are of £10 Gross Estimated Rental, but no compounded Occupier has hitherto been placed on the Register.

The houses rated to landlords which are let out in distinct tenements are not distinguished in the Valuation Lists from those which are let to single tenants. No occupier of any such tenement has come on the Register.

Rolls Liberty.—There are in this liberty, not included in the Return, 74 houses of £10 and over Rateable Value let out in distinct tenements, one at £9 and under £10, seven at £8 and under £9, and 16 at £7 and under £8.

St. Giles and St. George, Bloomsbury, United Parishes.—The Gross Estimated Rental is inserted in the rate only in those cases in which the Owners compound, and is the Estimated Rent payable to the Landlord, he paying all rates and taxes, insurance, &c. The Rateable Value entered in the rate is the full Rateable Value, and not the reduced Rateable Value in respect of which the Landlord is charged in composition.

There are 575 tenements assessed to the owners at the Rateable Value of £10 and over, including 232 tenements compounded for, rated at £10 and over Gross Estimated Value. 29 persons rated in respect of those houses are on the Register. The Occupier unless he is the person rated is not placed on the Register.

There are 982 houses for which no Occupier's name appears in the list of voters, because the tenements are rated either to Females or Landlords who compound.

There are 85 houses let out in distinct tenements. The number and value of the separate occupations cannot be ascertained without a house-to-house visitation.

The difference between the Returns of Male Occupiers, Gross Estimated Rental, and Rateable Value, is explained by the fact that the former was made in August 1865 from the Lady-day rate, and the latter in December from the Michaelmas rate.

St. Mary, Islington, Parish.—The Gross Estimated Rental represents the full rack rent. It is the full rent paid by the tenant to the Landlord when the latter pays the rates, &c.

The Rateable Value is arrived at by deducting from the Gross Estimated Rental one fifth, except when the Owners compound, in which case one half is deducted, the remaining half being inserted in the rate as the Rateable Value.

There are 3,829 compounded houses of £10 and over Gross Estimated Rental; scarcely any, if any, of the Occupiers get upon the Register; they do not claim.

It is estimated that there are about 2,000 houses let out in distinct tenements. There is nothing in the Rate Book to indicate the number or value of the separate occupations. The Occupiers are not on the Register.

About 2,000 persons are not placed on the Register yearly, because of nonpayment of assessed taxes.

St. Luke, Middlesex, Parish.—The Gross Estimated Rental represents the full rackrent, and in the case of compounded houses the full rent paid by the tenants, the Landlord paying tenants' rates and taxes.

The Rateable Value is arrived at by deducting one fifth from the Gross Estimated Rental, except in the case of compounded houses, when a deduction of one half is made, the remaining half being entered as the Rateable Value.

The number of compounded houses is 2,273.

There is a model lodging-house in Golden Lane, containing 176 rooms, let at from 4*s*. 6*d*. to 5*s*. 6*d*. per pair. There are also a great many houses let out in distinct tenements. The tenants' names do not appear on the rate, and there is nothing to indicate the number or value of the separate occupations. It would not be possible to obtain this information without a house-to-house visitation.

Stoke Newington Parish.—The Gross Estimated Rental represents the full rackrent, and in the case of compounded houses the full rent paid by the tenant to the Landlord, including the rates for which the Landlord is assessed.

Compounded houses are rated at one half the Estimated Rental. In other cases a deduction of one sixth is made from the Gross Estimated Rental in estimating the Rateable Value, except when tenants covenant to do the repairs, and in those cases 10 per cent. only is deducted.

There are no houses in the parish let out in distinct tenements.

In the Parish of Charlton a deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10; in Plumstead and Greenwich a deduction of 25 per cent.; and in St. Paul and St. Nicholas, Deptford and Woolwich, 30 per cent.

---

* The greater part of the Royal Arsenal, Woolwich, is within the Parish of Plumstead in this Borough, and the Royal Dockyard is contiguous to that Parish.

† The Clerk to the Guardians of the Greenwich Union states that he has come to the conclusion that the Gross Estimated Rental shown in the Valuation Lists is below the actual rack rent, especially in the parishes of Saint Nicholas and Saint Paul, Deptford. In the other parishes the deficiency is not so great, Greenwich being about a fair estimate, and Woolwich somewhat below. The result of the comparison of the Income Tax and Poor Rate Assessments will, he believes, lead to the Assessment Committee bringing up the parishes of Saint Nicholas and Saint Paul, Deptford, and Woolwich, to the proper standard. He at the same time states that he believes the Income Tax Assessment to be in many cases too high.

The Gross Estimated Rental is stated to represent the amount at which the property is considered worth to let, the tenant paying his own taxes, and not the full rack rent actually paid.

A deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10.

---

* The difference between these two amounts arises from the Gross Estimated Rental in the Valuation List being based upon an estimate of what property would let for from year to year, the tenant paying his own taxes, whilst the other extends to the rent actually paid. The excess relates almost exclusively to dwelling-house property, which in many instances has from local differences with the ground landlord reached a point not likely to be long maintained.

† As regards the number of persons on the Register as £10 Occupiers being in excess of the Male Occupiers at a Gross Estimated Rental of £10 it is accounted for mainly by Occupiers proving before the Revising Barrister an actual payment of £10, although assessed upon a Gross Estimated Rental of somewhat less than that sum.

---

* In Hythe there are a great many men who, although only journeymen mechanics or labourers, live in a better class of house than in many towns, in consequence of their wives earning a portion of the living by letting rooms in the summer to visitors. The South-Eastern Railway Company also employ a large number of men at high wages.

† The difference between these amounts is accounted for by the fact that the Commissioners of Taxes have the exact Rentals returned to them, whilst the Assessment Committee have generally estimated the Gross Rental.

‡ With reference to the number of Male Occupiers at £10 Gross Estimated Rental (1,203) being less than the number of Electors as £10 Occupiers (1,251), it is stated that on the Register are found persons who have lately died, and some who removed at Michaelmas last.

† With reference to the difference between the two assessments it is stated that the Income Tax Assessment was made in April, whereas the Gross Estimated Rental is taken from the Valuation Lists now in force, and the amount since April has been increased by Supplemental Lists.

---

* The difference between the number of Male Occupiers at a Gross Estimated Rental of £10 and the number of Electors on the Register as £10 Occupiers it is stated is attributable to the rapid changes of occupancy in a mercantile town, and to the fact that upwards of 1,000 new houses are built and occupied in the year, the Occupiers of which would not come on the Register of July.

Amongst the male occupations at £10 and upwards Gross Estimated Rental in the parishes of Holy Trinity and St. Mary, 1,164 are stated to be compounded for. In these cases the Gross Estimated Rental includes the additional amount paid by the tenant to the landlord to cover the tenant's rates and taxes. This estimated additional amount for compounded houses at and over £10 is £2 per annum; for houses at £9 and under £10, £1 10*s.*; and for houses at £8 and under £9, £1.

Lambeth Parish.—The Gross Estimated Rental represents the full rack rent, the tenants paying rates, &c., except in cases of farmed property, when it is the actual rent paid, the Landlord discharging the tenant's rates. In arriving at the Rateable Value one sixth is allowed from the Gross Estimated Rental, excepting when the property is farmed, when one third of the Gross Rental is allowed. The true Rateable Value, and not the composition in respect of which the Landlord is charged, is entered as the Rateable Value.

There are 9,879 tenements at and above £10 Gross Estimated Rental rated to the Owners instead of the Occupiers. 5,781 Compound Occupiers are on the Parliamentary Register.

There are 97 houses in the parish above the Rateable Value of £10 let out in distinct tenements. A considerable number are lodging-houses. In 11 of these houses the number of those separate lettings is as follows :—28 at and above £10, 13 at £8 and under £10, and 10 at £5 and under £8.

St. Giles, Camberwell, Parish.—The Gross Estimated Rental represents the full rack rent. A deduction equal to 34 per cent. is allowed in arriving at the Rateable Value of houses at and under £10. These houses are, however, compounded for by the Owners, and the weekly rental of the property is taken as the standard in pounds sterling for its compound value ; thus a house of the weekly rental of 3*s.* would be assessed to the Owner at £3 per annum.

4,921 tenements at and above £10 rental are rated to the Owners instead of the Occupiers. There are at present only five of such Occupiers on the Register.

There are no houses in the parish let out in distinct tenements.

St. Mary, Newington, Parish.—The Gross Estimated Rental, except in the case of compounded houses, represents the full rack rent. The rule, with regard to compounded houses, in estimating the Gross Rental, is to deduct 20 per cent. from the rack rent paid by the tenant to the Landlord. Upon this reduced amount the Rateable Value is based, and is made by a further deduction of 50 per cent., so that in the case of a £10 house the Rateable Value in respect of which the Landlord would be charged would be £4.

There are upwards of 6,800 houses in the parish for which the Owners are rated. Of those 5,550 are of an annual value to give a vote for the borough, and of that number 4,360 are tenanted by Male Occupiers who are placed on the Parliamentary Register.

There are 159 houses in the parish at and above £5 Rateable Value let out in distinct tenements. In no instance has an Occupier of a distinct tenement claimed to be rated and afterwards been placed on the Register.

---

* It is stated that in Newington parish a staff of persons were employed to call at all the houses in the parish, the names of the Occupiers of which are on the Register, where the calling of the residents was unknown, and that special care was exercised in eliciting the exact number of persons supporting themselves by daily manual labour.

---

* With reference to the difference between these amounts it is explained that several properties exempt from rates by reason of their use for public purposes, such as buildings connected with a County Lunatic Asylum, Judges Lodgings, are included in Schedule A. In consequence of the cotton distress the value of several mills was reduced, but no alteration has been made in the Income Tax Assessment. A new mill and some other property is inserted in Schedule A. which had not at the time of the Return come into the Valuation List.

† With reference to the difference between the number of Male Occupiers at £10 Gross Estimated Rental and the number of persons on the Register as £10 Occupiers, it is stated that those on the Register as Freemen have not been inserted in the Occupiers' List, except in a few cases in which it has been done inadvertently.

---

* The large number of the Working Class on the Register is attributed to the fact that there is a custom prevailing chiefly in the parish of St. Stephen of allowing labourers to occupy a field or two, which gives them the Franchise.

† With refesence to the number of Electors on the Register as £10 Occupiers being in excess of the Male Occupiers at £10 Gross Estimated Rental, it is stated as follows :—There are persons on the Register who are rated for land only, and others whose Gross Estimated Rental is as low as £5 5*s.* In some portions of the borough the rents and probably the sums in the Valuation List are very low, and on the other hand there can be no doubt that there are persons on the Register who should not be there, some of them having been removed on objection being made before the Revising Barrister, and restored by the Overseers without any alterations in their tenancies, and these have been allowed to pass from the fact that no opposition was offered on the last revision of voters.

The Gross Estimated Rental is stated to represent the full rack rent in Leeds, Holbeck, Templenewsam, Bramley, Chapel Allerton, Potter Newton, Seacroft, and Farnley. In Wortley it is considered a fair representation of the full rack rent. In Beeston and Armley it is one third, in Hunslet one sixth, and in Headingley-cum-Burley one eighth, less than the rack rent.

A deduction of one sixth is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10 in the Townships of Holbeck, Templenewsam, Leeds, Bramley, Beeston, Chapel Allerton, Potter Newton, Wortley, Farnley, and Hunslet; from one third to one sixth in the Township of Armley; and in the Township of Headingley-cum-Burley one sixth for Houses above £8 5*s.*, and 50 per cent. for Houses under £8 5*s.*, which are compounded for. There are no Houses of the class referred to in the Township of Seacroft.

In Leeds where the owner pays rates the proportion paid for rates out of the amount received by the owner for rent and rates together is about 3*s.* 7*d.* in the pound on the gross amount he receives.

---

* With reference to the difference between these amounts it is stated that all the small tenements in the Borough are classed under Schedule A. at the full rack rent, less the amount of tenant's rates actually paid by the Landlord; whereas in cases where the rates on tenements are compounded for, the Gross Estimated Rental in the Poor Rate is the value of the Property after the deduction of all tenant's rates estimated, but not actually paid thereon by the Landlord. Also many religious, charitable, literary, scientific, and other institutions which are assessed to the Income Tax are omitted from the Poor Rate Assessment.

† In Leeds township all premises that are let out in separate apartments are rated to the several separate Occupiers, the tenants, names appear in the Poor Rate, and are included in the Return of Male Occupiers.

* With reference to the large number of the Working Classes on the Register it is stated that there is an extensive tract of land belonging to the Freemen, a part of which is allotted in gardens, and over the other part of which they have a right of common. The desire to possess land is very general, and no sooner does a young man entitled to the freedom of the borough attain his majority than he at once takes up his freedom. However numerous may be his family, all the males are like himself Freemen. In many of the trades also the workmen earn large wages, whereby if they are prudent men they are soon enabled to remove to a better house, or, what not unfrequently happens, become the owners of one through a building society.

† As regards the difference between the number of £10 Occupiers on the Register and the number of Male Occupiers at £10 Gross Estimated Rental it is stated that since July 1864 when to confer the franchise £10 houses must have been on the Rate Book hundreds of new houses have been erected, the majority of which are of a value of £10 and upwards. Since Midsummer last also there has been a new Valuation List, and rents having largely increased in consequence of the prosperous state of the town an addition of at least £8,000 has been made to the Gross Estimated Rental, the greatest increase being on houses from £8 to £12 in value. This advance being made at Midsummer last, the Occupiers would only get on the Register in the few instances in which claims were made.

* It is stated with reference to the number of masons and carpenters included in the Return that there is only one person who keeps a number of men in his employ, and that the public are obliged to rely on jobbing masons, &c. The bakers included are persons who convert into bread flour sent them to be prepared and baked, they charging a certain amount for their trouble. The labourers and farmers are occupiers of small plots of ground which are barely sufficient to find them employment on an average for one day in the week, the remainder of their time being spent in working for the neighbouring farmers as day labourers.

† The Income Tax Assessment it is stated is based on the Valuation Lists of 1863, and the Poor Rate Assessment on the Valuation Lists of 1865.

---

* The difference between the number of Male Occupiers at £10 Gross Estimated Rental and the number of Electors on the Register as £10 Occupiers is attributable to disqualification on account of the length of occupation not being sufficient, nonpayment of rates, and the calling of persons, as Officers of the Excise, Customs, &c. In Liverpool Parish from 90 to 95 per cent. of the difference is accounted for by the rates not having been paid in full in the case of Occupiers of tenements of the annual rateable value of £15 and under. Many names also are struck off by the Revising Barrister on account of non-attendance to support claims to vote.

In Liverpool Parish there are 16 houses let out in distinct tenements. The annual rateable value of the occupations in the case of these tenements is as follows :—At £10, 3 ; at £9, 11 ; at £8, 2 ; at £6, 9 ; at £5, 21 ; at £4, 9 ; at £3, 3. In the other townships in the borough there are no houses so let out.

A weekly rental of 3*s.* 3*d.* or 3*s.* 6*d.*, the landlord paying the rates, represents a Gross Estimated Rental of £7 and a Rateable Value of £6.

* The explanation offered of the discrepancy in these amounts is that certain properties, such as gas and water pipes, telegraph wires, hospitals &c., which are rated to the Poor Rate, are not assessed to the Income Tax, Schedule A.

† No Return has been received for the Middle Temple.

In the City of London Union there are 619 blocks of buildings let out as offices, counting-houses, &c., for which the names of the original lessees only appears on the Rate Book, and not the name of the Occupiers. The number cannot be ascertained, except by house to house visitation.

* Mr. May, Clerk to the Guardians, states with reference to the small number of the Working Clases on the Register that wages have been lower and much more precarious in Macclesfield than elsewhere for a series of years, and that the distress amongst the operative class has been severe and trying. In consequence the rents of cottages and houses generally are much lower than in other towns, and of late years they have so materially diminished in value as to render them absolutely unprofitable. There are upwards of 1,000 houses in the borough unoccupied. A house of £10 value in Macclesfield would be worth £15 in the prosperous towns of Yorkshire and Lancashire.

† The assessment of mills to the Income Tax is much higher than to the Poor Rate In 16 cases in which comparison was made the Income Tax Assessment is £9,784, whilst the Poor Rate Assessment is only £5,273, and nearly half of the difference between the totals of the two assessments is thus accounted for.

* With reference to the number of the Working Class on the Register, it is stated that there is a silk manufactory in Malmsbury employing a large number of hands, and that upwards of 280 householders, principally of the Working Class, derive emoluments from certain corporation properties bequeathed to the Inhabitants of the Borough, and their successors for ever, by King Athelstan for the valour of their ancestors in a battle fought with the Danes.

* With reference to the excess of Electors on the Register as £10 Occupiers over the Male Occupiers at £10 Gross Estimated Rental, it is stated that in the Parish of Old Malton there are 72 acres or thereabouts of land belonging to one proprietor, who is also owner of houses in New Malton and Old Malton, both within the Borough ; this land is let to the occupiers of the houses in small plots varying from one acre to a rood each, and the rent of the land being added to the rent of the houses in many instances raises the actual rental paid by the tenant to £10. The proprietor of the land is rated for the same in one sum, and the value of the land occupied by the tenants does not appear against their names in the Rate Book, and consequently they are not included in the Return as £10 Occupiers. As, however, the tenant proves the payment of rent amounting to £10, he is placed on the Register. There may also be cases in which the Overseers have under-estimated the annual value of dwelling-houses

A Local Act, 21 & 22 Vict. c. 62. (the Manchester Overseers Act), is in force in the Parishes of Manchester, Ardwick, Chorlton-upon-Medlock, and Hulme. Under it Owners are to be rated for Houses not exceeding £10 annual Rateable Value, and for Houses, &c. let or sub-let in separate apartments as storehouses. By sect. 13 Occupiers are authorized to claim to be rated, and upon payment of the rate due, if any, they are to be deemed as rated from the time of making the claim.

---

* The difference between the number of Male Occupiers at £10 Gross Estimated Rental and Electors on the Register as £10 Occupiers is attributable to the number of persons who have not resided or have not been rated for a sufficient period.

† In the Township of Manchester there are 211 houses let out in distinct tenements, and these are included in the Returns according to the value of the respective occupations so far as they could be ascertained. There are no houses of this character in the other townships in the City.

On an average a deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10. In the Parish of Preshute the deductions are from 20 to 30 per cent.

---

* The difference between the two assessments is thus explained :—In the Income Tax Assessment for Preshute in two or three instances farms situate partly in Preshute and partly in other parishes not within the Parliamentary Borough are assessed wholly in Preshute. In several instances also the Income Tax Assessment is raised by the Surveyor or otherwise above the Gross Estimated Rental of the Valuation List.

† The explanation given of the difference between the number of Male Occupiers at £10 Gross Estimated Rental (271) and the number of persons on the Register as £10 Occupiers (275) is as follows : The Parliamentary List is dated July 1865, whereas the Valuation Lists were made at various dates in the previous year.

A deduction of from 15 to 25 per cent., according to state of repair, is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10 in the Parishes of Great Marlow and Little Marlow, according to the condition of the Houses, a deduction on the average of 17¼ per cent. in the Parish of Medmenham, and of 20 per cent. in the Parish of Bisham.

---

* The large number of the Working Class on the Register it is stated is attributable to a large brewery in the Borough, and a large shoe manufactory in the neighbourhood, also to cottages of small rentals being let to one person, the portion not required by him being sublet to others.

† The difference between the two assessments it is stated may be accounted for by the Woodlands, which are considerable, being included in the Income Tax Assessment, and not in the Poor Rate Return. Tithe rentcharge to the amount of £2,780 is included in the former assessment, and not in the latter. The Returns of Rents made to the Income Tax Commissioners are in most cases much higher than the Gross Estimated Rental in the Valuation Lists.

St. Marylebone Parish.—The Gross Estimated Rental represents the full rack rent. A deduction of 10 per cent. from the Gross Estimated Rental is allowed in arriving at the Rateable Value.

The number of Houses in the parish for which the Landlord is rated and does not reside therein is as follows: At £10 and over, 661 ; at £9, 66 ; at £8, 183 ; at £7, 54 ; above £6 and under £7, 12 ; at £6, 34 ; at £5, 16 ; at £4, 31. The value of the several occupations can only be ascertained by a house to house visitation. In these cases the number of tenements, and not of Male Occupiers, is given in the Return. In some instances the Occupiers of Houses let out in separate tenements have claimed to be rated, and have been placed on the Register, such claimants having a private and separate entrance to the house they in part occupy. The parties inhabiting the majority of such apartments are weekly tenants and of a migratory class.

St. Pancras Parish.—The Return as to Male Occupiers at a Gross Estimated Rental was based on the rate of April 1865, and that as to Rateable Value on the rate of October 1865. This explains the difference in the number of Male Occupiers at £10.

There are very few Houses in the parishes let out in distinct tenements. The annual value of each occupation in these cases can only be ascertained by a house to house visitation.

When the Owners are assessed instead of the Occupiers the Rateable Value is equal to two thirds of the rack rent.

The Gross Estimated Rental represents the full rack rent. A deduction of 15 per cent. is made from the Gross Estimated Rental to arrive at the Rateable Value in the cases in which the Owners do not compound.

Only 27 of the 823 £10 compound Occupiers have claimed to be rated for the purpose of being placed on the Register.

Paddington Parish.—The Gross Estimated Rental is stated to represent the full rack rent. A deduction of one fourth is made from the Gross Estimated Rental in fixing the Rateable Value.

Of the 721 £10 compound Occupiers about 60 are on the Register.

There are about 244 Houses in the parish which are let out in distinct tenements. The number and value of the separate occupations in these Houses can only be ascertained by a house to house visitation. The number of tenements is given in the Return. None of the Occupiers of these tenements are on the Register.

---

* The number of the Working Classes on the Register for the Parish of St. Pancras was arrived at by an estimate. The number on one-fourth of the Register was ascertained to be 701, and the total for the entire Parish was estimated at four times that number, or 2,804. This course was adopted in consequence of a representation that without a house-to-house visitation the exact number for the whole Parish could not be ascertained.

The Gross Estimated Rental is stated to represent the full rack rent.

A deduction of 25 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10 in the Parishes of Christchurch, Newport, and Saint Wollos, 20 per cent. in the Parishes of Dixton and Monmouth, and 15 per cent. in the Parish of Usk, The portion of the Borough within the Parish of Gwehelog does not contain any Houses of the description referred to.

---

* With reference to the number of the Working Class on the Register, it is stated that in Newport rent is so exceedingly high that by far the greater proportion of houses are of the value of £10 a year and upwards, so that very many working men become entitled to the franchise by rental, who at the same time let out perhaps the greater part of their houses to lodgers. The large number returned for the contributory Borough of Usk is attributed to the general condition of the Working Classes themselves.

† The difference between the two assessments it is stated may be accounted for in Newport by double assessments to the Income Tax, and by the fact that since that assessment was made the rates on many properties have been reduced by the Assessment Committee on appeal. In Monmouth, in one or two instances items amounting to £840, and other large sums, are included in the Income Tax Assessment which do not appear in the Valuation Lists.

* In addition to this number there are 8,684 houses of the Gross Yearly Rent or Value not exceeding £6, and 4,978 exceeding £6 and not exceeding £9. These houses, which are rated to the owners instead of the occupiers under the Local Act above referred to, are not included in the Return, as they are entered in the Rate Books in groups in aggregate sums, and the Rate Books do not afford the means of distributing them under the proper heads.

The compound houses have been, however, included under the several heads of Rateable Value upon a return furnished by Mr. Hotson, the District Auditor. In explanation of the return, Mr. Hotson states, "The cottages for which the owners are assessed have been "dealt with in the way suggested, viz., after making the usual deductions for repairs, &c. by dividing the Rateable Value of each "owner's cottages by the number, and placing the result, which would represent the average Rateable Value, under its corresponding "head, and from the numbers thus obtained deducting what appeared to me a fair allowance for female occupiers and empties."

* It is stated that the Income Tax Assessment is almost invariably higher in amount than the Poor Rate Assessment.

† With reference to the excess of Electors on the Register as £10 Occupiers (624) over the Male Occupiers at £10 Gross Estimated Rental (617) it is stated that in Knottingley some of the Householders on the Register are not represented in the Rate Book as occupying Houses at £10 Gross Estimated Rental. When the Revising Barrister holds his court the actual amount of rent amounting to £10 and upwards is proved by the evidence of some valuer or other competent person, who satisfies the Revision Court that the Occupier is entitled to be on the Register, although it does not appear so by the Rate Book.

* The large number of the Working Classes on the Register is accounted for by an immense number of artizans being employed in the dockyard and other public works, and the number of persons connected with the army and the navy.

† The Surveyor states that the discrepancy arises from the government property, viz. public buildings, &c. in the dockyards, fortifications, and barracks, which are assessed in one amount for a contribution in aid of the Poor Rate, not being included in his Return.

* It is stated with reference to the number of the Working Classes on the Register that at the biscuit factory of Messrs. Huntley and Palmer between 600 and 700 men are employed, and at the Reading Iron Works between 400 and 500, that many men are also employed by Messrs. Sutton and Son, seedsmen, the railway engineering works, and the builders in the borough, and that a considerable proportion of them occupy houses at from £10 to £15 Rental. Houses have been built with amazing rapidity, the houses being chiefly of a Rental of £10 and upwards. The three lines of railway with branches have led to a large increase in the trade.

† The reason why the number of Burgesses is so much less than the number of Electors is stated to be that many persons obtain their one year's qualification for the Parliamentary Register who do not continue long enough to obtain their three years' qualification for the Burgess Lists, and that a large number of Occupiers of Houses are not put upon the Burgess Lists in consequence of their Rates being compounded for and paid by the Landlords.

‡ The names of the Occupiers of houses from £4 to £8 do not appear in the Rate Book as the Owners are assessed. The number of tenements and not of Male Occupiers is therefore given. Soon after the Union Assessment Committee Act came into operation returns were obtained of the names of the Occupiers, and it was found that from 10 to 15 per cent. were widows or spinsters.

§ The explanation afforded of the number of Male Occupiers at a Gross Estimated Rental of £10 being so much in excess of the number of Electors on the Register as £10 Occupiers is as follows : The returns of Gross Estimated Rental were made subsequently to the Revision of the Register by the Revising Barrister, and therefore include all new houses of £10 annual value which the Occupiers could not claim votes for in August last. At the Registration Court several persons rated at £9 Gross Estimated Rental claimed to be put on the Register, and the claims were admitted, and in consequence all houses of the same description have been raised by the Assessment Committee from £9 to £10.

---

* The large number of the Working Classes on the Register is accounted for by the fact that many persons are employed by the London and Brighton and South-Eastern Railway Companies at the Redhill Junction, and on the main lines and branches, and that there is an unusual number of gardeners in the Borough employed chiefly as jobbing gardeners, and of mechanics at work on the houses in course of erection.

† An assessment to Income Tax of new property, which is now being prepared, will, it is believed, amount to over £3,000.

* With reference to the number of Working Classes on the Register it is stated that the borough is so circumscribed that many of the better class of artizans reside outside the boundary. Many of the houses in the borough are built with small rooms, and can be let at low rentals, affording separate apartments for the Occupiers, whilst a similar house with larger rooms would command such a rental as would confer the franchise.

[*] The disparity between the number of Burgesses and that of the Parliamentary Electors is attributed to the greater length of residence and rating requisite for acquiring the Municipal Franchise.

[†] It is stated that when the Assessment Committee revised and allowed the Valuation Lists they did so with the full knowledge of the Income Tax Assessment, and they considered that it was not a fair and just mode of estimating the rentals for the purpose of rating. In many instances it was observed that the rentals in the Schedule were excessive, and did not represent the value according to a just interpretation of the Parochial Assessment Act.

[‡] The explanation of the difference between the number of Male Occupiers at a Gross Estimated Rental of £10 (345) and the number of Electors as £10 Occupiers (356) is as follows:—There are persons on the Register who occupy premises appearing in the Valuation Lists at Gross Estimated Rentals varying from £7 10*s.* to £9. A person has claimed to be inserted on the List of Voters, at the same time that he has complained of his assessment for the same premises at £9. Rental for the purpose of a vote, and rental with the view of rating, are practically different.

* With reference to the large number of the Working Classes on the Register it is stated that in Salford the rents are much higher than in the other towns in the manufacturing district, as most of the operatives employed in the manufactories and warehouses in Manchester reside in the suburbs of that city, there not being sufficient house accommodation for them in Manchester. Many of the better-paid class of mechanics, porters in warehouses, and other operatives employed in Manchester reside in Salford, and occupy houses at rents of from 4*s.* 6*d.* a week which enables them to be placed on the Register. The clerk states that in order to make the Return as accurate as possible he employed persons to make a house-to-house visitation of the Voters on the Register.

† The explanation of the large excess of Electors over the Male Occupiers at a Gross Estimated Rental of £10 is that under the 59 Geo. 3. the rates made upon houses up to £20 are paid by the Owners, and they are rated at three fourths the sum which would have been payable by the Occupiers. The Overseers in arriving at the Gross Estimated Rental deduct the whole of the rates which would be payable by the Occupier were he rated; and where the rent is paid weekly, a further sum of 5 per cent. for cost of collection. The Revising Barrister, however, to arrive at the amount of annual rental, deducts the amount of rates actually paid, and nothing more.

‡ In the township of Salford there are houses let out in distinct tenements, but the several occupations are entered in the Rate Book, and have been included in the Return of Male Occupiers.

[*] With regard to the number of Working Classes on the Register, it is stated that the Return represents as nearly as possible that class of persons whose living is (one way or another) earned by daily manual labour. In some cases the means of living may be extended by the employment of a very small amount of capital,—no more, in fact, than a skilled artizan would in several trades have invested in his working tools.

[†] It is stated with reference to the excess of Male Occupiers at £10 Gross Estimated Rental over the number of Electors on the Register as £10 Occupiers, that a very large number are excluded from the Register by nonpayment of rates, or not having resided for the requisite period. Some are excluded from indifference as to whether they have a vote or not, or from neglect to appear and defend their qualification when impeached.

* The large number of the Working Classes on the Register is attributed to the circumstance that many of the workmen of Sheffield earn large wages, and can afford to occupy houses of the value of £10 a year. It is stated that there is scarcely another Borough in which the earnings of the Working Class are so high as in Sheffield.

* With reference to the number of Working Classes on the Register it is stated that the mode of living in Shrewsbury is widely different from that in the manufacturing districts. Most married men become householders and not lodgers merely, and on the whole are much more provident than in the districts alluded to. There is no staple trade in Shrewsbury, but the persons included in the Return find employment at the various works in the town, and earn sufficient money to enable them to occupy 10*l.* houses.

In the Town of Southampton the Guardians in determining the Rateable Value are guided by a scale of weekly rents, for instance, tenements let at a weekly rental of 3*s.* and under 3*s.* 6*d.* are assessed at £5 Rateable Value, at 3*s.* 6*d.* and under 4*s.* at £6. Tenements of £10 Gross Estimated Rental are invariably assessed at £6 Rateable Value. In the tithing of Portswood a deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value for Houses above £6, and 25 per cent. for Houses at £6 and under.

---

* The large number of the Working Classes on the Register is attributed to the existence of the docks, railways, and manufactories in the Borough, and to the interest exhibited by the political parties to secure for the Working Classes the franchise. The Register was returned with a request that the occupations of the Voters might be inserted therein, but it was stated by the Clerk to the Guardians that to do so would involve considerable expense, and entail going over the whole of the work again. He at the same time most confidently vouched for the accuracy of the Return in every particular.

† The Clerk to the Guardians states that the rule adopted by the Guardians who under a Local Act make the Poor Rates is to bring under the operation of the Small Tenements Act all houses of the yearly rent of £10. The reason the Guardians have extended the operation of the Small Tenements Act to houses of as high a value as £10 per annum is, that such a vast number of the occupants were excused the payment of the rates that this class of property was exempted from the payment of rates altogether.

Rotherhithe Parish.—The Gross Estimated Rental in the case of compounded tenements, of which there are a very large number, represents the full rack rent paid by the tenant, inclusive of the tenant's rates, for which the landlord is assessed. The Rateable Value of that class of houses is the value in respect of which the landlord is charged.

There are 1,426 houses of £10 Gross Estimated Rental for which the landlords are assessed. Not more than six compound occupiers are placed on the Parliamentary Register. There are generally from four to six claims each year, but the claimants do not attend the Revising Barrister's Court, and are consequently not put upon the List. In most cases of compounded properties the house is let to one tenant, who sublets portions to lodgers.

St. George-the-Martyr Parish.—The Gross Estimated Rental represents the full annual value. A deduction of one fifth is made from the Gross Estimated Rental in fixing the Rateable Value. A further deduction of about one third is made in the case of houses compounded for.

There are 4,293 compounded houses. It is the practice to send persons to all the houses rated to Owners at 5*s.* per week rental or upwards to ascertain the names of Male Occupiers who have resided 12 months previously to the 21st July in each year. Those names are placed on the list of Voters, and vary from 1,500 to 2,000 upon lists of from 3,600 to 4,200 names.

There are a few houses let out in distinct tenements.

St. Olave's Union.—Comprising the parishes of St. John, St. Olave, and St. Thomas. The Gross Estimated Rental represents the full rack rent. A deduction of 25 per cent. is allowed in arriving at the Rateable Value. In the case of compounded houses a further deduction of 20 per cent. is made in the parish of St. John, of 25 per cent. in the parish of St. Thomas, and of 45 per cent. in the parish of St. Olave.

There are 202 compounded houses above £10 Gross Estimated Rental. Only one compound occupier is on the Register.

There are houses let out in distinct tenements, but the number cannot be ascertained without a house to house visitation.

St. Mary Magdalen, Bermondsey, Parish.—The Gross Estimated Rental represents the full rack rent when the houses are not compounded for. In the case of compounded houses the composition is at £1 for every 1*s.* per week rent paid. The Rateable Value represents the reduced value in respect of which the landlord is charged. When the rates are compounded for the occupier's name appears on the Rate Book, and the Male Occupants of such houses are annually placed on the Register of Voters, provided the landlords have complied with the requirements of the Statutes for the Registration of Voters. The number of Voters upon the year's Register is 5,351. There are 4,383 Male Occupiers of compounded property rated at and above £10, and it is estimated that about 4,000 are on the Register. These Occupiers, generally speaking, belong to the Working Classes, and they have been included as such in the Return.

1,050 persons are disqualified by non-payment of assessed taxes. The only building let out in separate tenements is the Metropolitan Lodging-house. It contains 108 sets of rooms ; the occupants are not on the list of Voters.

St. Saviour's Union.—Including the parishes of St. Saviour and Christchurch.

In the parish of St. Saviour in the case of compounded houses the Gross Estimated Rental is the rent paid by the tenant, the landlord paying rates, &c. In Christchurch one third is deducted for rates. One half is deducted from the Gross Estimated Rental in fixing the Rateable Value in the parish of St. Saviour, and one third in the parish of Christchurch.

There are 1,068 compounded houses above £10 Gross Estimated Rental, and 350 Occupiers of such houses are on the Register.

† It is stated that where landlords pay the rates on small tenements they do not pay so high a rate as the Income Tax Assessment. Also that there are many complaints that the latter assessment is too high, and that handbills have been issued on the subject.

‡ With reference to the difference between the number of Electors on the Register as £10 Occupiers and the number of Male Occupiers at £10 Gross Estimated Rental, it is stated that there are a few houses where under peculiar circumstances the tenants actually pay £10 Rent, although the various committees formed to assist the overseers in making out the Valuation Lists could not conscientiously say that such houses could be let for that sum if they were now to become unoccupied.

* Included in this number are nearly 70 gardeners. It is stated that they are not farmers. The quantity of land occupied by them is small, being from half an acre to three or four acres. The land being very productive when well managed affords a precarious livelihood for the occupiers. No doubt in the spring and summer additional labour is employed, chiefly women for weeding and labourers to assist in getting in the crops, but there is not a single one who does not work all through the year as hard as a simple labourer, keeping the regular hours, and the great majority of them are not easily to be distinguished from labourers. They would not have votes but for the circumstance that the gardens are let with the houses, thus raising the occupation to above £10.

* The large number of the Working Classes on the Register is attributed to the Borough being situate in a mining district and there being three iron foundries in the town. In two or three cases persons are included as miners who also occupy a little land, but their principal support is obtained by their labour as miners.

† With reference to the properties below the value of £6, and more particularly those below £5 and £4, it is stated that it is almost impossible to make an accurate return, as there are several tenants occupying one house, in several cases a tenant of every room, without making a house-to-house visitation. The numbers given approximate tolerably near to the facts. These remarks apply but in few instances to cases where the rental is above £6.

‡ The Surveyor of Taxes states that the Clerk to the Guardians informs him that the amount given as the Gross Estimated Rental is correct, and that the amount stated by him is the correct sum assessed to the Income Tax, and that he cannot ascertain the cause of the difference unless it is that the Income Tax is charged upon a higher value than the Poor Rate Valuation.

Bethnal Green Parish.—The Gross Estimated Rental it is stated represents the full rack rent, but for many years no attention was paid to filling up correctly the Gross Estimated Rental column in the case of compounded houses. One sixth is deducted from the Gross Estimated Rental in fixing the Rateable Value when the houses are not compounded for under the Local Act. The Rateable Value of compounded houses represents the value upon which the landlord is charged.

The number of compounded houses on a Gross Estimated Rental of £10 is 9,127, and the change of occupation is so frequent that it is impossible to get the occupiers' names on the rates. 700 compound occupiers are placed on the Register.

A house-to-house visitation would be necessary to ascertain the number of houses let out in distinct tenements. It is believed that there is no case of an occupier of a house let in separate tenements claiming to be rated.

St. George-in-the-East Parish.—The Gross Estimated Rental is stated to be the rent at which the property might be expected to let free of tenant's rates and taxes, the tenant taking those burdens upon himself. A deduction of one fifth is made from the Gross Estimated Rental in fixing the Rateable Value when the houses are not compounded for.

The Rateable Value as entered in the Rate Book in the cases in which the owners compound is the reduced value on which the owners are charged.

Very few, if any, of the occupiers of the 3,234 £10 compounded houses are at present on the Register.

The number of houses let out in distinct tenements cannot be ascertained without a house-to-house visitation.

St. John, Hackney, Parish.—The Gross Estimated Rental represents the full rack rent. One sixth is deducted from the Gross Estimated Rental in arriving at the Rateable Value when the owners do not compound. In the case of compounded houses 20 per cent. is taken off and the amount is then halved, and on that amount the landlord pays.

Of the occupiers of £10 compounded houses 69 are on the Register. From various causes, principally from a want of interest on the part of the tenants, the Compound Householders Act of 1852 has become in this parish a dead letter.

There are 16 houses above the annual value of £10 let out in distinct tenements ; 15 of these are very old houses and are about to be pulled down.

Mile End Old Town Hamlet.—The Gross Estimated Rental represents the full rack rent, and a deduction of one fifth is made from the Gross Estimated Rental in fixing the Rateable Value when the owners do not compound. In the case of compounded houses the rent actually paid by the tenants, although the owner pays the rates, &c., is entered as the Gross Estimated Rental. A deduction of two fifths is made on account of repairs, &c. in arriving at the Rateable Value.

There are four or five houses let out in distinct tenements. The separate occupations would be under 50. The single rooms let for 1*s.* 9*d.* or 2*s.* per week.

Not more than 20 of the occupiers of compounded houses are on the Register. The average claims under Sir W. Clay's Act have not exceeded 5 per year during the last seven years.

Poplar Union.—The parishes comprised in this Union are Bow, Bromley, and All Saints, Poplar. The Gross Estimated Rental represents the full rack rent. A deduction of 20 per cent. is made in fixing the Rateable Value. It is stated that in this Union there are many hundreds of houses assessed to the owners. In the Parish of Poplar there are but 21 compound occupiers on the Register. The lists for Bromley and Bow do not distinguish that class of voters, but it is believed that they include but a very small number of such occupiers.

There are several houses let out in distinct tenements. The number of the separate occupations cannot be ascertained without a house-to-house visitation.

In the Parish of All Saints, Poplar, there are 4,052 houses for which the owners are rated, and of these it is estimated that one fifth are occupied by females. Only 23 of the occupiers of these houses are on the Register. The Vestry Clerk of the parish states that the average annual number of claims to be placed on the Register under Sir W. Clay's Act has not during the last 10 years exceeded 20. Not a single claim was made in 1865, and when persons have claimed they have failed to appear before the Revising Barrister to support their claims. He adds, "I am of opinion that if all persons entitled (under Sir William "Clay's Act) to be put upon the Register were to make their claim and attend to establish it, the numbers on "the Register would be increased threefold, viz. from 1,450 to 4,350; but the usual reply I receive when "I inform the claimants they will have to attend the Revising Barrister's Court is, 'Oh, I am not going to "'lose my time to go there. If you cannot put me on the Register I shall not trouble myself any further.'"

St. Leonard, Shoreditch, Parish.—The Gross Estimated Rental represents the rent the houses would let for by the year. A deduction of one third is made from the Gross Estimated Rental in arriving at the Rateable Value. It would appear that in the Gross Estimated Rental Return persons holding more than one tenement have been entered more than once, and in some cases empty houses have been included.

Only about 50 occupiers of the 4,157 £10 compounded houses are placed on the Register.

It is believed that there are but few houses let out in distinct tenements, but a house-to-house visitation would be necessary to obtain accurate information. There are model residences for the working classes, consisting of four blocks, containing 20 sets of apartments in each. The tenants pay from 5*s.* to 7*s.* 6*d.* per week.

Stepney Union.—The parishes comprised in the Union are Limehouse, Ratcliff, Shadwell, and Wapping The Gross Estimated Rental represents the full rack rent. A deduction of 20 per cent. is made from the Gross Estimated Rental in arriving at the Rateable Value.

There are a great number of houses let out in distinct tenements, and it is estimated that about one fourth of the compound property in Limehouse (2,795 houses), one half of the compound property in Ratcliff (584 houses), and one third of the compound property in Shadwell (612 houses) and Wapping (205 houses), are let in distinct tenements. In Limehouse 10 of the owners of compounded houses are on the Register, in Ratcliff 24, but none in Shadwell and Wapping. No occupiers of houses, let out in distinct tenements, are on the Register.

Whitechapel Union.—The parishes comprised in this Union are St. Botolph, Aldgate, Christchurch, St. Katherine, Mile End New Town, Holy Trinity, Minories, Norton Folgate, the Old Artillery Ground, the Old Tower Without, and St. Mary, Whitechapel. The Gross Estimated Rental represents the full rack rent. A deduction of 15 per cent. is made from the Gross Estimated Rental in arriving at the Rateable Value.

Very few indeed of the tenements rated to the owners instead of the occupiers are occupied by one family only, but most of them by several families, by six or eight or more. Some are common lodging-houses rated to the owners, who sublet to a middleman, who lets out beds, &c., and in these great numbers of Males as well as Females reside for indefinite periods, some for a night and two, some for years. In the buildings erected by the Commissioners for improving the Dwellings of the Poor, perhaps more than a hundred Males sleep nightly in one building, while in another there are 60 or 70 families.

It is not usual in this Union to place occupiers of compounded houses on the Register. As a rule the names of the occupiers of such houses are not entered in the Rate Book. If an occupier of a compounded house should claim to be rated under Sir W. Clay's Act he would generally speaking be rated at an occupier's rating, and not on the scale on which owners are assessed.

* In the borough of Westbury there are several cloth manufactories, and there are a great number of persons occupying small quantities of land, some as little as one acre, others from two to three acres and upwards, who obtain their living principally by working on the land and from their own manual labour, although in some instances they have little shops principally kept by their wives.

Strand Union comprises the following parishes in the City :—St. Anne, Soho, St. Clement Danes, St. John Baptist Savoy, St. Mary-le-Strand, and St. Paul, Covent Garden. The Gross Estimated Rental is stated to represent the full rack rent. A deduction of about 25 per cent. is made in arriving at the Rateable Value.

Mr. Kilner, the Clerk to the Guardians, states that there is in his district a large number of houses let out in distinct tenements by Landlords who do not themselves reside on the premises. The Landlord in these cases insure, repair, and pay all rates and taxes on the premises. The tenants' names never appear on the Rate Books. The number of houses let out in distinct tenements is as follows :—At £10 and over, Rateable Value, 687 ; at £9 and under £10, 24 ; at £8 and under £9, 10 ; at £7 and under £8, 1 ; at £6, 3 ; at £4 and under £6, 5. These houses are not included in the Return of Male Occupiers.

On an inquiry as to the number of tenants and the rents paid by them in 12 houses in the parish of St. Anne, Westminster, held by one Landlord, it was ascertained that there were (including the apartments from the kitchen to the attics) 1 tenant at 1*s.* 6*d.* per week, 4 at 2*s.*, 1 at 2*s.* 3*d.*, 14 at 2*s.* 6*d.*, 1 at 2*s.* 9*d.*, 5 at 3*s.*, 2 at 3*s.* 3*d.*, 12 at 3*s.* 6*d.*, 11 at 4*s.*, 1 at 4*s.* 3*d.*, 7 at 4*s.* 6*d.*, 10 at 5*s.*, and 8 at 5*s.* 6*d.*; and also for shops in the same houses, 1 tenant at 10*s.* per week, 4 at 10*s.* 6*d.*, 1 at 11*s.*, and 2 at 20*s.* There were therefore 85 distinct lettings, averaging 7 for each house.

St. James, Westminster, Parish.—There are no houses under £10 value in the parish.

There are about 550 houses let out in distinct tenements. The number of separate occupations can only be ascertained by a house-to-house visitation. Since the Reform Act passed in 1832 there have not been more than a dozen instances in which the Occupiers of houses or parts of houses let out in separate tenements have claimed to be rated, and at the present time there is only one such case on the Register of Voters.

St. Margaret and St. John, Westminster, Parishes.—The Gross Estimated Rental is stated to represent the full rack rent, and that to arrive at the full rack rent the Property Tax Assessment is resorted to, and generally adopted. A deduction of 10 per cent. is generally made in arriving at the Rateable Value.

In explanation of the slight variation between the Number of Occupiers under the several heads of Gross Estimated Rental and Rateable Value it is stated that the figures come out nearly the same in both forms, the difference between the Gross Estimated Rentals and the Rateable Value being for sums under £10 less than £1.

The number of houses of £10 Gross Estimated Rental compounded for is 1,418.

There are between 600 and 700 houses which are believed to be let out in distinct tenements. The number of separate occupations is presumed to be above 1,500, and the value of each is estimated to be at 4*s.* a week and upwards. It is impossible to obtain accurate information on this subject without a house-to-house visitation.

Neither the Occupiers of houses in respect of which the Owners are assessed, nor the Occupiers of rooms in houses let out in distinct tenements, appear on the Register.

St. George, Hanover Square, Parish.—The excess of Male Occupiers at £10 Rateable Value as compared with the number of Male Occupiers at £10 Gross Estimated Rental is explained by the fact that the former Return was made in October 1865, and the latter in December, and that between the two periods in several cases Males became Occupiers of houses previously held by Females, and some empty houses became occupied. The Vestry Clerk is not aware of any houses being let in distinct tenements. A house-to-house visitation would be necessary to obtain precise information.

St. Martin-in-the-Fields Parish.—The Gross Estimated Rental represents the full rack rent. About 20 per cent. is deducted from the Gross Estimated Rental in arriving at the Rateable Value.

The number of Owners rated instead of Occupiers are 234. The Occupiers of compounded tenements do not appear on the Register.

There are 291 houses let out in distinct tenements. The number of separate occupations could only be accurately ascertained by a house-to-house visitation. The Occupiers of houses let out in distinct tenements are not placed on the Register. There is on record one instance of the Occupier of a tenement being on the list of Voters, but he was struck off by the revising Barrister.

A deduction of 20 per cent. is made from the Gross Estimated Rental in estimating the Rateable Value of Houses at and under £10.

---

* With respect to the large number of Working Classes on the Register the explanation given is that it is to be attributed to the fact of the Borough being a populous seaport, in consequence of which rents are comparatively high, and but a very small number of the Working Classes occupy houses at a less rent than £10 a year. Many let lodgings.

† The Clerk to the Guardians ascribes the difference between these amounts to the fact that there are several assessments to the Income Tax in respect of incorporeal hereditaments not assessed to the Poor Rate, such as Harbour and Coal Dues, Bridge and Pier Dues, &c. The Surveyor of Taxes, however, states that he is satisfied that the Poor Rate is about 20 per cent. below the actual rental assessed to the Income Tax.

* With reference to the small number of the Working Classes on the Register it is stated that the borough is inhabited almost entirely by persons engaged in coal and iron works. The persons so employed have amongst them very few mechanics or skilled artizans, the coal of course employing none scarcely, and the iron very few, as the iron is only made into plates, bars, and rails.

† The Poor Rate Assessments in many of the properties have been considerably reduced since the Income Tax Assessment was made in consequence of the stoppage of some of the works. And in estimating the Gross Estimated Rental for cottage property the Poor Rates are taken out at once, whereas in the Income Tax Assessment no allowance is made unless claimed by the landlord. In Aberdare alone there are between 5,000 and 6,000 cottages.

The other 96 Banks with 205,380 individual Depositors have not made the Return; but assuming the numbers in the four classes in question to bear in these 96 Banks the same proportion to the total number of individual Depositors as they do in the 460 Banks which have made the Return, the numbers in the 96 Banks will be as follows:—

Deposits of 50*l.* and less than 60*l.*,—	
For one year - - -	1,704
For two years or upwards -	1,947
Deposits of 60*l.* or upwards,—

For two years or upwards -	10,309

males of full age, whose deposits were between 30*l.* and 40*l.*, 40*l.* and 50*l.*, and 50*l.* and upwards (*see* Return No. 1, annexed), distributed by average the total number of banks in the United Kingdom ; the number of depositors in those 404 banks being equal to 79½ per cent. of the whole number 1864 in the same proportion to the total number of depositors as in the year 1852.

No. 4.—*continued.*

Therefore if any privilege or qualification be given to each adult male Depositor who has had a deposit of not less than 50*l.*, for a period of at least one year, it would include all four classes or 97,190 persons.

If the line were drawn at a deposit of not less than 50*l.* for a period of not less than two years, it would include 87,340 persons.

If at a deposit of not less than 60*l.* for a period of not less than one year it would include 77,031 persons.

But if the limit be raised to 60*l.* for two years, then only 65,025 persons would so become privileged or qualified.

* F. indicates Freemen; S. & L., Scot and Lot Voters; A. R., Ancient Right qualifications.

(*a*) The Returns for the places thus marked contain the *number of tenements*, and not the number of Male Occupiers only, so far as regards tenements which are rated to the owners instead of the occupiers. In those cases a deduction of 20 per cent. has been made on account of *female occupiers* and *unoccupied tenements*.

† In the Boroughs marked thus (†) the number of Occupiers at 10 *l.* and over (*see* Col. 11) is less than the net number of Electors on the Register (*see* Col. 3), whose qualification is that of Occupiers, owing chiefly, it is believed, to the "Gross Estimated Rental" being below the "Clear Yearly Value."

Note.—Many of the Burghs in the foregoing Return are situated in other Counties than those against which they are placed. This has been found necessary, in order that the various groups of Burghs which return a Member might be kept together. But in these cases the details relating to such Burghs, in so far as situated without the County, are not included in the aggregate Return given for the County.

The number of Houses include unoccupied Dwelling-houses, as well as those occupied.

1 MARCH 1860.—23 Vict.

A BILL further to amend the Laws relating to the Representation of the People in England and Wales.

Preamble.

WHEREAS it is expedient to make further Provision for the due Representation of the People in Parliament: Be it enacted by the Queen's most Excellent Majesty, by and with the Advice and Consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the Authority of the same, as follows:

Right of voting in counties to be enjoyed by occupiers of houses, &c. of the yearly value of 10 *l.*

I. Every Male Person of full Age, and not subject to any legal Incapacity, who shall occupy within and County, or Riding, Parts, or Division of a County, in England or Wales, except within the Limits of a City or Borough which shall return a Member or Members to serve in Parliament, or of a Place sharing in the Election for such City or Borough, as Owner or Tenant, any House, Warehouse, Counting-house, Shop, or other Building, being either separately or jointly with any Land within such County, Riding, Parts, or Division (except within such Limits as aforesaid) occupied therewith by him as Owner, or occupied by him therewith as Tenant under the same Landlord, of the clear yearly Value of not less than *Ten Pounds,* shall, if duly registered, be entitled to vote in the Election of a Knight or Knights of the Shire to serve in Parliament for such County, Riding, Parts, or Division: Provided always, that no such Person shall be so registered in any Year unless he have resided for *Six* Calendar Months next previous to the *last Day of July* in such Year within such County, Riding, Parts, or Division.

Residence required.

Provisions concerning occupation franchise in boroughs extended to occupation franchise in counties.

II. The Provisions hereinafter mentioned with reference to the Right to vote in the Election of a Member or Members to serve in Parliament for a City or Borough, in respect of the Occupation of Premises in such City or Borough, and to be registered in respect of such Right, that is to say, the Provisions now in force as to the Time of such Occupation, as to being rated, claiming to be rated, and Payment of Rates, and as to successive and joint Occupation, shall be applicable to the Right to vote in the Election of a Knight or Knights of the Shire conferred by this Act, and to be registered in respect of such Right, as if such Provisions were re-enacted, mutatis mutandis, with reference thereto.

The yearly value required to give a right of voting in boroughs to be 6 *l.* instead of 10 *l.*

III. The Occupation of Premises within a City or Borough which shall return a Member or Members to serve in Parliament, or within a Place sharing in the Election for such City or Borough, of the clear yearly Value of not less than *Six Pounds,* shall confer a Right to vote in the Election of such Member or Members, in like Manner as such Right is now conferred in respect of the Occupation of Premises of the clear yearly Value of not less than Ten Pounds; and all Provisions now in force concerning such Right in respect of such Occupation shall, save as herein otherwise provided, be applicable to the Right hereby conferred, as if Six Pounds were mentioned in Section Twenty-seven of the Act of the Session holden in the Second and Third Years of King William the Fourth, Chapter Forty-five, and were mentioned or referred to in all other the Provisions concerning such Right, instead of Ten Pounds.

2 & 3 W. 4, c. 45, ss. 24 and 25, not to apply where the right to vote in a borough is taken away by the previous section.

V. Enactments requiring payment of assessed taxes by occupiers previous to registration repealed.

VI. So much of Sections Twenty-seven, Twenty-eight, and Twenty-nine of the said Act of the Second and Third Years of King William the Fourth, and so much of an Act of the Session holden in the Eleventh and Twelfth Years of Her Majesty, Chapter Ninety, and of an Act of the Session holden in the Fourteenth and Fifteenth Years of Her Majesty, Chapter Fourteen, as requires as a Condition of the Registration in any Year of any such Occupier of Premises as therein mentioned, or of his Title to vote in the Election for any City or Borough, that he shall have paid on or before the Twentieth Day of July in such Year all the Assessed Taxes which have become payable from him as therein mentioned, shall be repealed.

* The number of Voters on the Register is 1,090 instead of 1,021, as stated in the Electoral Returns. The Returning Officer inserted the net number of Electors instead of the gross number of names, in the column intended for that purpose in his Return, and omitted to state that the double entries had been deducted.

† In this and the other cases marked thus, the Electoral Returns give only the Votes recorded. The actual number of persons who voted has since been supplied by the Crown Office from the Poll Books.

‡ The total number of Voters in this case has been ascertained to be 949 instead of 861 as stated in the Electoral Returns. The error was occasioned in the first instance by an inaccuracy in the numbers furnished by the Returning Officer.

§ In this case the number of Votes recorded at the last Election is given. Application has been made at the Crown Office to ascertain the actual number of persons who voted, but in consequence of the Poll Books being before an Election Committee, the information cannot at present be ascertained.

‖ The Total, includes the number of Votes recorded in the case of Nottingham.

Lanark - -	- - Nil. - - - -	- -	- -	There are no burghs in Lanarkshire where there are persons exercising the functions of magistrates or councillors except Parliamentary burghs, or burghs under the General Police Act, in both of which the magistrates and councillors or commissioners are elected by popular election. There are a good many burghs of barony over the county other than those above referred to; some of them small towns, others mere villages or hamlets, but there are no magistrates or councillors exercising jurisdiction within them. In only some of them is there even a baron bailie nominated by the superior, and he never holds a court. A few of these bailies are named commissioners *ex officio* in Acts of Supply, and prior to the passing of the Valuation Act the appointments were generally made with a view of qualifying them as such. These burghs of barony, therefore, do not appear to fall under the Return. Supposing they did, there would be considerable difficulty in finding the population and voters within them, because of doubt about the boundaries. Although the Charter of Erection were found, and it contained a boundary, it would not be easy at the present day to identify it.

MEMORANDUM.

Prior to the Act of Union (6 Anne, c. 11), the Burghs of Scotland were represented by 67 Members, designated Commissioners, who were elected by the Town Councils of the several Burghs.

By an Act passed by the Scotch Parliament on the 5th of February 1707, in pursuance of Art. 22 of the Articles of Union, and intituled "An Act settling the Manner of electing Sixteen Peers and Forty-five Commoners to represent Scotland in the Parliament of Great Britain," the whole of the then represented Burghs were formed into the several Districts described in Table 2, Edinburgh alone retaining its separate representation, but returning one Member only instead of two. By this Act, which was afterwards confirmed by the Act of Union, provision was made that each separate Burgh should continue to choose a Commissioner as before, and that the Commissioners for each district should elect one Representative in Parliament for the whole of the Burghs comprised within it. In this manner the number of Members for the Scotch Burghs was reduced from 67 to 15.

This arrangement continued in operation until the passing of the Reform Act, 2 & 3 Wm. 4, c. 65, s. 10, under which the right of election was taken away from the Town Councils and Commissioners, and conferred upon the occupiers and owners of premises within the respective Burghs of the yearly value of 10*l.*

By the same Act, the Burghs of Selkirk, Peebles, and Rothesay were disfranchised as Burghs; some of the districts were re-arranged, and augmented by the addition of unrepresented towns; and separate representation was given to Aberdeen, Dundee, Glasgow, and Perth. The towns of Greenock and Paisley were enfranchised with a separate representation, and a second Member was given to Edinburgh.

The list of Burghs included in Return No. 1 corresponds with the roll of the Scotch Parliament of 1706, and the particulars of the column in Return 2, which shows the number of persons constituting the Town Councils of the several Burghs, have been extracted from "Oldfield's Representative History, 1816."

2 June 1866. *John Lambert.*

ELECTORAL RETURNS (SCOTLAND).

MEMORANDUM.

The following Returns have been obtained by the direction of Her Majesty's Government for the purpose of furnishing, with respect to the Burgh and County Constituencies of Scotland, information similar to that contained in the Electoral Returns for England and Wales, which were presented to both Houses of Parliament on the 9th of March last.

Return 1.

Male Occupants at and over 4*l.*

This Return shows the number of Male Occupants in the Burghs of Scotland at certain stated annual values, commencing at 4*l.*

The particulars from which the Return is compiled have been furnished by the Local Assessors from the Valuation Rolls now in force, and in order to determine how far the Assessments can be relied upon as evidence of value it will be useful to state in what manner and upon what principle the Valuation Rolls are prepared.

Valuation of Lands (Scotland) Act.

By the 17 & 18 Victoria, Cap. 91. the Commissioners of Supply of each County and the Magistrates of each Burgh in Scotland are required to cause a Valuation Roll to be made up, showing the yearly rent or value of the whole of the Lands and Heritages within the County or Burgh respectively and separately, specifying in each case the nature of the Lands and Heritages, and the names and designations of the Proprietors and Occupiers.

In order to the making up of the Valuation Rolls the Commissioners and Magistrates are empowered to take the assistance of the Officers of Inland Revenue charged with the duty of assessing the Income Tax, and they are directed, as occasion requires, to appoint Assessors, whose duty it shall be to ascertain and assess the yearly rent or value of the several Lands and Heritages (other than Railways and Canals, which are specially provided for,) within each County and Burgh, and every Assessor on his appointment is required to declare that he will faithfully and honestly perform the duties of his office.

A new Valuation Roll is required to be made up every year, and the Act directs that the yearly value shall be taken to be the rent at which, one year with another, the property might, in its actual state, be reasonably expected to let from year to year. When the property is *bonâ fide* let for a yearly rent conditioned on the fair annual value without consideration other than the rent, such rent is to be deemed the yearly value in the terms of the Act. An appeal against the Valuations made by the Assessors may be made to the Commissioners or Magistrates. In all cases where any premises are let at a

Rent not amounting to 4*l.*, and the names of the Occupiers do not appear on the Valuation Roll the proprietors are to be assessed. The only money columns in the Valuation Rolls are those which show the yearly Rent or Value.

8 & 9 Vict. c. 83.

The Local Rates, with the exception of the Poor Rate, are levied on the yearly rent or value entered in the Valuation Rolls, but in levying the Poor Rate a deduction is made for "the probable annual average cost of the "Repairs, Insurance, and other expenses, if any, necessary to maintain the "property in its actual state, and all rates, taxes, and public charges payable "in respect of the same."

Return 2.

Electors (Working Classes).

This Return shows the number of Electors on the present Register for each Burgh classed according to their several qualifications, the number of the Electors who are of the Working Class, and the number of Electors of each Class who voted at the last General Election.

Qualifications of Electors.
Occupants.
Owners.

It should be observed with reference to the qualifications of Burgh Electors in Scotland that not only 10*l.* Occupants are entitled to vote as in England, but persons residing within seven miles of any Burgh are entitled to be registered as Burgh Electors if they are the Owners of premises within the Burgh of the yearly Value of 10*l.* or upwards, although they do not occupy any property within its limits, or although the premises actually occupied by them are of less yearly Value than 10*l.* The husbands of such Owners are entitled to vote either in the lifetime of their wives or after their death, if then holding the property by the courtesy of Scotland.

The particulars of this Return also have been supplied by the Local Assessors.

Return 3.

Occupants at 7*l.* and under 10*l.*

This Return shows the number of Male Occupants on the Valuation Roll of each Parliamentary Burgh whose real rents are under 10*l.* and not under 7*l.* An important feature in this Return is, that it distinguishes the working men earning weekly wages, but who do not occupy any business premises or carry on a separate business, from those who, through their wives or other members of their families, occupy shops and carry on a separate business. It also distinguishes the number of Occupants of the other classes, who are masters, from those who are clerks, shopmen, &c.

A summary appended to this Return gives the total of the Working Classes and Non-working Classes who are Occupants under 10*l.* and not under 7*l.*, and also the increase in the number of Electors between 1832 and 1866.

The information contained in this Return has been furnished by the Surveyors of Taxes.

Return 4.

Population.

The Population of the several Burghs for the year 1851 and 1861 as shewn in this Return has been taken from the Census Tables.

The Population of each separate Burgh is shown with the increase or decrease during the last decennial period.

Return 5.

Male Occupants (Counties).

This Return, which has been furnished by Mr. Fletcher, the Comptroller General, relates exclusively to Counties. It shows the number of Male Occupants at various Annual Values from £10 to £50 and upwards, distinguishing those who are Owners.

The Rentals have been extracted by the Local Assessors from the Valuation Rolls now in force.

Return 6.

Population and Electors (Counties).

This Return shows the increase or decrease in the Population of the several Counties between the years 1851 and 1861, and the increase or decrease in the number of County Electors between the years 1846 and 1866. It has been found necessary to select the year 1846 as the basis for the comparison of the number of Electors in consequence of the imperfect state of the earlier Returns. The Return 189, 1833, does not give the number of Electors for Scotland, and the Return 329, 1838, gives the total numbers in a few instances only.

Freehold Qualification.

It must be borne in mind that the Freehold Qualification for a County Voter in Scotland is an estate of the clear yearly value of £10, and not of 40*s.* only as in England; and if the Property is within the limits of a Parliamentary Burgh, the Owner, if registered at all, must be registered for the Burgh, and cannot vote for the County in respect of the Qualification.

Poor Law Inspector.

* The number of Occupants between £7 and £10 is considerably in excess of that returned by the Surveyor, who states as follows: "It appears to me that the Assessor has simply classified the rents appearing in the Roll without reference to the Occupants. † This Total is less than the number of Male Occupants under £10 and not under £7 included by the Assessors in Return No. 1. The discrepancy is chiefly occasioned by the omission in Return No. 3. of Persons whose Occupations do not appear on the Valuation Rolls, and of Post Office and Revenue Officials who are disqualified from voting, and by the insertion in Return No. 1. in one or two instances of the same Occupant in respect of more than one Qualification.

All the above Burghs and Districts of Burghs, with the exception of Edinburgh and Glasgow, return one Member each. Edinburgh and Glasgow return two Members each.

The quantities retained for home consumption in Scotland and Ireland respectively, as exhibited above, are obtained by deducting from the quantities charged with duty in each country; first, the quantities over-entered, and secondly, the quantities re-exported from the same country to foreign or colonial parts on payment of drawback.

Of the quantities shipped, after payment of the duty, from any one to any other of the three divisions of the United Kingdom, there is no official registry.
